**COASTAL CAROLINA
COMMUNITY COLLEGE**

Jacksonville, North Carolina

PURPOSE

The purpose of Coastal Carolina Community College is to provide specialized occupational education to fill the manpower needs in our society, and to provide a two-year college-transfer program, and to provide for the fullest possible development of the potential of each student so that he may attain effective citizenship in his society.

COLLEGE CALENDAR 1973-74

SUMMER QUARTER (Full Session 55 days)

June 6 and 7	Registration
June 11-15	Late Registration
June 11	Classes Begin
June 15	Last day to register or add a course
July 2, 3 and 4	Holiday
August 9	Last day to withdraw from classes
August 27, 28 and 29	Summer Quarter Final Exams
August 29	Summer Quarter Ends
August 31	Graduation

SUMMER QUARTER (1st Split Session 27 days)

May 21	Pre-registration Technical Students Ragsdale Building, Study Room 11:30-4:00
May 21	Pre-registration Sophomore (College Transfer) Student Lounge, Georgetown Campus 8:30-12:00 1:00- 3:00
May 22 and 23	Pre-registration Freshmen (College Transfer) Student Lounge, Georgetown Campus 8:30-12:00 1:00- 3:00
June 6 and 7	Registration 8:30-12:00 Georgetown Campus. Pay- ment of tuition and fees—Business Office 8:30-2:00
June 11, 12, and 13	Late Registration 8:30-12:00 Georgetown Campus Business Office hours 8:30-12:00
June 11	Classes begin
June 13	Last day to register or add a course
July 2, 3 and 4	Holiday
July 13	Last day to withdraw from class
July 16	Pre-registration Technical Students for 2nd Split Session, Ragsdale Building, Study Room, 11:30-4:00
July 16	Pre-registration Sophomores (College Transfer) for 2nd Split Session. Student Lounge, Georgetown Cam- pus 8:30-12:00, 1:00-3:00
July 17	Pre-registration Freshmen (College Transfer) for 2nd Split Session. Student Lounge, Georgetown Cam- pus 8:30-12:00, 1:00-3:00
July 20	1st Split Session Final Exams
July 20	1st Split Session Ends

SUMMER QUARTER (2nd Split Session 28 days)

July 23	Registration 8:30-12:00 Georgetown Campus. Pay- ment of tuition and fees—Business Office 8:30-2:00
July 24, 25 and 26	Late registration 8:30-12:00 Georgetown Campus Business Office hours 8:30-12:00
July 24	Classes begin
July 26	Last day to register or add a course
August 20	Pre-registration Technical Students for Fall Quarter Ragsdale Building
August 20	Pre-registration Sophomores (College Transfer) for Fall Quarter. Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00

August 21 and 22	Pre-registration Freshmen (College Transfer) for Fall Quarter. Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
August 23	Last day to withdraw from class
August 30	2nd Split Session Final Exams
August 30	2nd Split Session ends
August 31	Graduation

FALL QUARTER

September 3	Holiday
September 4, 5 and 6	Faculty On-Campus Workshop
September 7	Orientation
September 10 and 11	Registration 8:30-12:00 Georgetown Campus. Payment of tuition and fees—Business Office 8:30-2:00
September 12-18	Late Registration 8:30-12:00 Georgetown Campus Business Office hours 8:30-12:00
September 12	Classes Begin
September 18	Last day to register or add a course
October 22	Veterans Day (Holiday for students only—work day for all college personnel)
November 9	Last day to withdraw from class
November 19	Pre-registration Technical Students for Winter Quarter, Ragsdale Building Study Room 11:30-4:00
November 19	Pre-registration Sophomores (College Transfer) for Winter Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
November 20 and 21	Pre-registration Freshmen (College Transfer) for Winter Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
November 22 and 23	Holiday
November 28, 29 and 30	Fall Quarter Final Exams
November 30	Fall Quarter Ends

WINTER QUARTER

December 3 and 4	Registration 8:00-12:00 Georgetown Campus. Payment of tuition and fees—Business Office 8:30-2:00
December 5-11	Late Registration 8:30-12:00 Georgetown Campus Business Office hours 8:30-12:00
December 5	Classes Begin
December 11	Last day to register or add a course
December 24	Holiday begins at 8:00 a.m.
January 2	Classes resume 8:00 a.m.
February 8	Last day to withdraw from class
February 18	Pre-registration Technical Students, Spring Quarter, Ragsdale Building, Study Room 11:30-4:00
February 18	Pre-registration Sophomores (College Transfer) for Spring Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
February 19 and 20	Pre-registration Freshmen (College Transfer) for Spring Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
February 26, 27 and 28	Winter Quarter Final Exams
February 28	Winter Quarter Ends

SPRING QUARTER

March 4 and 5	Registration 8:30-12:00 Georgetown Campus. Payment of tuition and fees—Business Office 8:30-2:00
March 6-12	Late Registration 8:30-12:00 Georgetown Campus Business Office hours 8:30-12:00
March 6	Classes Begin
March 12	Last day to register or add a course
April 12 and 15	Holiday
May 3	Last day to withdraw from class
May 13	Pre-registration Technical Students for Summer Quarter, Ragsdale Building, Study Room 11:30-4:00
May 13	Pre-registration Sophomors (College Transfer) for Summer Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
May 14 and 15	Pre-registration Freshmen (College Transfer) for Summer Quarter, Student Lounge, Georgetown Campus 8:30-12:00, 1:00-3:00
May 21, 22 and 23	Spring Quarter Final Exams
May 23	Spring Quarter Ends

THE COLLEGE

HISTORY

The State of North Carolina recognized the need to provide additional post-high school vocational opportunities as early as 1957. The development of Industrial Education Centers was approved by the General Assembly and by 1962, twenty (20) institutions were approved.

In the fall of 1963, the Onslow County Board of Education and the Superintendent of Schools, Mr. J. Paul Tyndall, asked the Onslow County Commissioners to purchase forty (40) acres of property on U. S. Highway 17 for the establishment of an Industrial Education Center. The newly established Industrial Education Center was a unit of the Lenoir County Technical Institute.

The untiring efforts of Representative Hugh A. Ragsdale, Representative William D. Mills and Senator Carl Venters secured an appropriation from the 1965 General Assembly to establish a separate institution for Onslow County. The North Carolina State Board of Education approved the Onslow County Industrial Education Center on July 1, 1965.

The continuous increase in enrollment of the Industrial Education Center gave evidence of the wide and varied needs of the area. Local support was necessary for the growing institute. The people of Onslow County, by referendum in the fall of 1965, voted for a seven cents per hundred dollars evaluation on property for the center. The Board of Trustees, realizing that a technical institute could more adequately provide the vocational and technical education opportunity for the area, requested that the State Board of Education grant technical institute status to the center. Onslow Industrial Education Center became Onslow Technical Institute on May 4, 1967.

A rapidly increasing enrollment and continued educational demands on Onslow Technical Institute encouraged the Board of Trustees to request a community college. Onslow Technical Institute was granted community college status July 1, 1970 and became Coastal Carolina Community College.

ACCREDITATION

- Southern Association of Colleges and Schools
- North Carolina Department of Community Colleges
- American Dental Association
- Approved—N. C. State Board of Education
- Approved—Veterans Administration

PHYSICAL FACILITIES

Coastal Carolina Community College is located on a fifty (50) acre campus at 222 Georgetown Road just outside the Jacksonville city limits. In addition to the four existing buildings, the college has developed long range plans to establish a new seventy-five (75) acre campus on Western Boulevard. A modern classroom building has been completed at this location and an occupational building is under construction.

LIBRARY

The library is located in the east wing of the administration building with a seating capacity of eighty (80) readers. This year we will have a split campus with study areas on both campuses.

Present library holdings include approximately 14,000 volumes in general, technical and vocational fields. The library subscribes to 250 periodicals. We have approximately 1,000 reels of microfilm. The library staff consists of two professional librarians, a library assistant, a secretary and student help.

The library also houses the audio-visual equipment.

The library hours are from 8 a.m.-9:30 p.m. Monday through Thursday and 8 a.m.-5 p.m. Friday.

BOOKSTORE

The college operates a bookstore where students may purchase books and supplies.

VISITORS

Visitors are always welcome at Coastal Carolina Community College. The Student Personnel Office will provide guide service for groups or individuals on weekdays between 8:30 a.m. and 5:00 p.m. The college is open until 9:30 p.m. Monday through Thursday and 8:00 a.m. until 5:00 p.m. Friday. Visitors are welcome during these hours. Questions about the college and its programs will be answered by personnel from the Student Personnel Office.

STATEMENT OF POLICY

Coastal Carolina Community College issues this catalog for the purpose of furnishing students and other interested persons with information about the college and its programs. The provisions in this publication are not to be regarded as an irrevocable contract between the student and Coastal Carolina Community College. The college reserves the right to change any provisions or requirement at any time within the student's term of residence, or to add or withdraw course offerings.

The contact hours shown in this publication are minimal. It is the policy of the college to permit students to enroll in additional subjects and laboratory work beyond those shown.

ADMISSIONS INFORMATION

ADMISSIONS POLICY

Coastal Carolina Community College maintains an "open door" policy for all applicants who are high school graduates or who have reached their eighteenth (18) birthday, and whose high school class has graduated. The college serves all students regardless of race, color, creed, sex, or national origin. Selective placement of individual students in the different curricula within the college is determined by the admissions officer, within the guidelines established by the State Board of Education and the Department of Community Colleges for each curriculum and course offered.

ADMISSIONS REQUIREMENTS

An applicant for admission to the Practical Nursing Curriculum, Dental Assistant Curriculum and all college transfer and technical curriculum must be a high school graduate or possess or have GED scores to qualify for a high school equivalency certificate issued by the North Carolina Department of Public Instruction or by the Department of Public Instruction of any one of the United States.

An applicant for a vocational program (except practical nursing and dental assistant as noted above) who has reached his eighteenth (18) birthday and has the ability as indicated on placement tests to make advancement in the program selected, may be admitted with a minimum of eight (8) units of accredited secondary education or its equivalent. Applicants are admitted upon the recommendation of the admissions officer.

A student desiring to transfer to Coastal Carolina Community College must be able to meet the admission requirements in effect at the time of his application. If the student is ineligible to return to the institution last attended, he may be admitted on probation to the college at the discretion of the Dean of Student Affairs.

Any adult is eligible to attend adult education classes offered by the college on campus or at any of the several locations in the college service area. Persons admitted to class must have reached their eighteenth (18) birthday and their regular public school classes must have graduated. Persons who are not eighteen (18) years of age may be admitted for special programs when approved by the appropriate secondary school officials and college officials.

ADMISSION PROCEDURE

Except for the continuing adult education programs, the admission procedure requires that the student:

1. submit an application,

2. submit a transcript of all previous education beyond the elementary school or GED scores of equivalency certificate.
3. report to the college for admissions counseling and appropriate testing (appointment schedules will be mailed as applications are processed).

TEN-HOUR REGULATION

Adult students may be admitted under special provisions which allows them to take up to ten (10) quarter hours of credit courses before completing admission requirements. However, all admission requirements must be met by the time the student has completed ten (10) quarter hours of work if credit is to be granted. This regulation does not apply to students working toward their high school diploma.

TRANSFER RESPONSIBILITY

The college staff will cooperate with each student in planning a transfer program. However, it is the responsibility of each student to determine that courses and credit will transfer to the receiving institution.

The acceptance of courses taken at Coastal Carolina Community College is determined solely by the institution to which the student transfers.

The Coastal Carolina Community College transfer student will have little difficulty in completing his transfer satisfactorily if he:

1. decides early which senior institution to attend (Contact the college for recommendations concerning appropriate courses),
2. obtains a current copy of the catalog of that college and studies its entrance requirements and its suggested freshman and sophomore program in the major field in which he is interested,
3. confers with his faculty advisor or guidance counselor at Coastal Carolina Community College about his transfer plans,
4. confers, either by letter or by personal interview, with an admissions officer at the senior institution for further information about curriculum and transfer regulations,
5. checks with his advisor or counselor a quarter or two before transfer to be certain that all requirements will be met and all regulations observed to the satisfaction of the senior institution.

SCHEDULES OF TUITION AND FEES

RESIDENCE STATUS FOR TUITION PAYMENT

1. **General:** The tuition charge for legal residents of North Carolina is less than for nonresidents. To qualify for in-state tuition, a legal resident must have maintained his domicile (legal residence) in North Carolina for at least the twelve months next preceding the date of first enrollment or re-enrollment in an institution of higher education in this state. Student status in an institution of higher education in this state shall not constitute eligibility for residence to qualify said student for in-state tuition.
2. **Minors:** A minor is any person who has not reached the age of eighteen years. The legal residence of a person under eighteen years of age at the time of his first enrollment in an institution of higher education in this state is that of his parents, surviving parent, or legal guardian. In cases where parents are divorced or legally separated, the legal residence of the father will control unless custody of the minor has been awarded by court to the mother or to a legal guardian other than a parent. No claim of residence in North Carolina based upon residence of a guardian in North Carolina will be considered if either parent is living unless the action of the court appointing the guardian antedates the student's first enrollment in a North Carolina institution of higher education by at least twelve months.
3. **Adults:** An adult is any person who has reached the age of eighteen years. Persons, eighteen or more years of age at the time of first enrollment in an institution of higher education, are responsible for establishing their own domicile. Persons reaching the age of eighteen, whose parents are and have been domiciled in North Carolina for at least the preceding twelve months, retain North Carolina residence for tuition payment purposes until domicile in North Carolina is abandoned. If North Carolina residence is abandoned by an adult, maintenance of North Carolina domicile for twelve months as a non-student is required to regain in-state status for tuition payment purposes.
4. **Married Students:** The legal residence of a wife follows that of her husband, except that a woman currently enrolled as an in-state student in an institution of higher education may continue as a resident even though she marries a nonresident. If the husband is a nonresident and separate or divorce occurs, the woman may qualify for in-state tuition after establishing her domicile in North Carolina for at least twelve months as a non-student.

- 5. **Military Personnel:** No person shall lose his in-state resident status by serving in the Armed Forces outside of the State of North Carolina. A member of the Armed Forces may obtain in-state residence status for himself, his spouse, or his children after maintaining his **domicile** in North Carolina for at least the twelve months next preceding his or their enrollment or re-enrollment in an institution of higher education in this state.
- 6. **Aliens:** Aliens lawfully admitted to the United States for permanent residence may establish North Carolina residence in the same manner as any other nonresident.
- 7. **Property and Taxes:** Ownership of property in or payment of taxes to the State of North Carolina apart from legal residence will not qualify one for the in-state tuition rate.
- 8. **Change of Status:** The residence status of any student is determined as of the time of his first enrollment in an institution of higher education in North Carolina except:
 - (a) In the case of a nonresident student at the time of first enrollment who has subsequently maintained domicile as a non-student for at least twelve consecutive months and
 - (b) In the case of a resident who abandons his legal residence in North Carolina.

In either case, the appropriate tuition rate will become effective at the beginning of the first subsequent term enrolled.

- 9. **Responsibility of Students:** Any student or prospective student in doubt concerning his residence status must bear the responsibility for securing a ruling by stating his case in writing to the Dean of Student Affairs. The student who, due to subsequent events, becomes eligible for a change in classification, whether from out-of-state to in-state or the reverse, has the responsibility of immediately informing the Dean of Student Affairs of his circumstance in writing. Failure to give complete and correct information regarding residence constitute grounds for disciplinary action.

TUITION

In accordance with the basic concept of comprehensive community colleges, all fees are nominal and are held to a minimum. Tuition per quarter is as follows:

Transfer Program Students (in-state)	
12 quarter hours or more (full-time)	\$42.00
Part-time students per quarter hour	3.00

Vocational Technical Students (in-state)	
12 quarter hours or more (full-time)	32.00
Part-time students per quarter hour	2.50
Out-of-state Students (All Programs)	
12 credit hours or more (full-time)	137.50
Part-time students per quarter hour	11.45

FEES

Activity Fee (per quarter)	\$ 7.00
Late Registration Fee	5.00
Insurance Fee per year (optional)	3.00

TUITION REFUND POLICY

Tuition refunds will be made only if the student is, in the judgment of the administration, compelled to withdraw for unavoidable reasons. In such cases two-thirds (2/3) of the student's tuition may be refunded, provided the student withdraws within ten (10) calendar days after the first day of classes. The activity fee is not refundable.

Refunds will not be considered for tuitions of five dollars (\$5) or less. In cases where a course or curriculum fails to materialize, all the student's tuition shall be refunded.

The refund policy is subject to change at the discretion of the State Board of Education.

BOOK COSTS

Students are required to purchase the necessary textbooks for courses. The estimated cost is \$30-\$50 per quarter. Book costs are usually higher for the fall quarter than at other times. Certain curricula requires equipment other than books, which increases the costs. Books may be purchased from the college bookstore.

ACADEMIC REGULATIONS

REGISTRATION

All students are urged to register on the days designated. A late registration fee of \$5 will be charged to all full-time students who register after the regular registration dates on the school calendar. This regulation applies to all programs—no exceptions are made.

QUARTER HOURS

The unit of measurement for credit purposes is the quarter hour. One (1) quarter hour represents the credit earned in a course that is scheduled for one (1) class hour per week for a quarter of eleven (11) weeks, except that for laboratory work, two (2) or more class hours in the laboratory are required for a single quarter hour of credit. Most courses meet three (3) hours a week and have a credit value of three (3) quarter hours. Generally a student will have to spend two (2) clock hours in preparation for one (1) class hour.

COURSE LOAD

The registration of every student is subject to the approval of his faculty advisor. A student who is registered for 12 or more quarter hours of course work is considered a full-time student; however, in order to maintain satisfactory progress toward a degree or diploma, a student is expected to carry a normal course load of 16 to 18 quarter hours. No college transfer student may carry in excess of 18 credit hours without permission of the Dean of College Transfer Education.

Students whose names appear on the Dean's List for the previous term and who have at least a 3.0 cumulative average may enroll for a maximum of 21 quarter hours during a regular term.

Students on academic probation are limited to 12 quarter hours, and students who work part-time or full-time should reduce their course loads accordingly.

AUDITING COURSES

Students who wish to audit courses must register through regular channels. Auditors receive no credit but are encouraged to attend classes regularly and participate in class discussions. Auditors will be charged the same fee as students taking courses for credit. An audit cannot be changed to credit or credit to audit after the deadline for adding courses.

CHANGE OF NAME, ADDRESS OR CURRICULUM

Students are responsible for notifying the Registrar's Office of all name, address or curriculum changes. This is necessary to keep all records in proper order.

ADDING AND DROPPING COURSES

A student who finds it necessary to drop or add a course should secure a "drop-add" form from the Student Affairs Office.

Students should pay particular attention to procedural directions as no course is officially dropped or added until the required procedure is completed.

The drop-add period will be observed through the period indicated by the school calendar.

The following steps should be followed:

1. Obtain drop-add form from Student Affairs Office.
2. Have advisor sign it.
3. Have instructor(s) involved initial it.
4. Return form to Registrar's Office for signature.
5. Turn form in at Business Office for validation.

No course may be added after one (1) week of classes (5 school days). No course may be dropped unless approval of the Dean of Student Affairs or Assistant Registrar is obtained.

For courses officially dropped after the first five (5) school days of a regular quarter, the grade of "WP" or "WF" will be reported according to the student's academic standing. The "WF" will be treated as an "F" in computing grade point averages.

A student may not withdraw from the college within fifteen (15) days of the end of a regular quarter for reasons other than those of a documented medical or emergency nature.

A student who leaves college after the first five (5) school days without obtaining an official withdrawal will receive an "F" for each course regardless of his academic standing at the time of his departure.

A grade of "I" may be given at the instructor's discretion to the student who has not successfully mastered course content but by attendance and concerted effort shows that he can attain mastery if given more time. The student is expected to repeat the course the following quarter or make up assigned work to remove the incomplete grade. The "I" grade will not be used in computing grade point averages. It must be removed during the next quarter in which the student is enrolled or the "I" automatically becomes an "F". In cases where a student has an "I" on record and does not re-enter for four (4) quarters, the "I" will automatically become an "F".

WITHDRAWAL FROM THE COLLEGE

A student who finds it necessary to withdraw from the college must do so through the Student Affairs Office. The student will complete a withdrawal form and obtain the signature of the various officials designated on the form.

If a student withdraws from the college within the first five (5) school days of a regular quarter no grade will be reported.

A student who officially withdraws from the college after the first five (5) school days of a regular quarter will receive a grade of "WP" or "WF" according to his academic standing. The "WF" will be given the same weight as the "F" in computing grade point averages.

A student may not withdraw from the college within fifteen (15) days of the end of a regular quarter for reasons other than those of a documented medical or emergency nature.

A student who leaves college after the first five (5) school days without obtaining an official withdrawal will receive an "F" for each course regardless of his academic standing at the time of his departure.

TRANSFER OF CREDITS

Educational work completed by students in other accredited institutions may, where applicable, be credited toward graduation requirements at Coastal Carolina Community College. In order to be eligible for graduation the student is required to attend full time for a minimum of two (2) quarters. The maximum credit transferable from another institution is sixty-six (66) quarter hours of academic study.

CREDIT FOR CORRESPONDENCE WORK

Ten (10) quarter hours of credit for correspondence courses applicable to courses offered at Coastal Carolina Community College may be accepted as transfer toward the Associate in Arts Degree.

CREDIT FOR WORK EXPERIENCE

College transfer or technical credit for work experience cannot be allowed except through the organized and supervised cooperative education program. Academic credit is not allowed for previous work and experience outside of the supervision of the college.

UNITED STATES ARMED FORCES INSTITUTE

Up to thirty (30) quarter hours credit of United States Armed Forces Institute course work may be accepted, if determined appro-

priate and applicable to courses offered at Coastal Carolina Community College, as transfer toward the Associate in Arts Degree.

ATTENDANCE

Coastal Carolina Community College is committed to the principle that class attendance is an essential part of its educational program. While urging regular class attendance, the College at the same time desires to allow students an opportunity to develop a sense of personal responsibility toward their studies. In keeping with these convictions, the following policy has been established.

At the beginning of each course, the instructor will announce his own attendance requirements. It is the responsibility of the student to understand and abide by these requirements. Each student is accountable for any work missed because of class absence. Instructors, however, are under no obligation to make special arrangements for students who are absent. When class absence seems to be contributing to a student’s unsatisfactory work or when the student is not fulfilling the attendance requirements, the instructor will warn the student and report that warning to the Dean of Student Affairs. If a student incurs other absences in a course after having been warned, he may be dropped from the course with a failing grade. When a student has been dropped from a course, he may, with the permission of the Dean of Student Affairs, appeal his case to the Attendance Committee for a final decision.

Veterans Administration regulations require that students who are going to school under the G.I. Bill and who are in a vocational curriculum must maintain 30 contact hours per week to receive full benefits.

GRADING SYSTEM

Official grades are issued for each student at the end of each quarter. Students enrolled in curriculum programs will be graded by the letter-grade system shown below.

Grade	Numerical Grade	Quality Points Per Quarter Hour
A—Excellent	93-100	4
B—Good	85- 92	3
C—Average	77- 84	2
D—Below Average	70- 76	1
F—Unsatisfactory	Below 70	0

I—Incomplete: This indicates failure to complete certain course requirements because of extenuating circumstances. All incompletes must be removed before the end of the succeeding term of enrollment or the grade becomes an automatic “F”.

In cases where a student has an "I" on record and does not re-enter for four (4) quarters, the "I" will automatically become an "F".

WP—Withdrew Passing: Student dropped the course, but had a passing average at the point of withdrawal.

WF—Withdrew Failing: Student dropped the course, and had a failing grade average at the point of withdrawal. This grade will be considered as an "F" with notation on transcript that course was not completed.

No grade will be reported if a student withdraws from school or from a course within the first five (5) school days of a regular quarter.

STUDENT CLASSIFICATION

Full-time Student—a student enrolled with twelve (12) or more quarter hours of credit.

Part-time Student—a student enrolled with fewer than twelve (12) quarter hours of credit.

Freshman—a student who has completed with a passing grade less than forty-five (45) quarter hours of credit.

Sophomore—a student who has completed with a passing grade forty-five (45) or more quarter hours of credit.

PRESIDENT'S LIST

At the close of each quarter, regular students who are carrying a full load (courses leading to a diploma or degree) will be included on the President's List, provided they have no grades of "I" or no grade lower than an "A".

DEAN'S LIST

At the close of each quarter, regular students who are carrying a full load (courses leading to a diploma or degree) will be included on the Dean's List, provided they have no grades of "I" or no grade lower than a "B" and provided that the quality point average of all their grades for that quarter is 3.25 or better.

ACADEMIC PROBATION

A student who fails to meet the minimum academic requirements will be placed on probation for the next quarter of attendance. Students transferring from other colleges or universities must meet the same requirements as other students. They may be admitted under probation if they are below the minimum requirements as outlined.

During the probationary period a student must maintain an overall “C” average or be suspended from his program for one (1) quarter.

ACADEMIC SUSPENSION

A student who fails to meet the minimum academic requirements while on probation may be suspended from his program of study for the following quarter. However, a student may enroll in a more appropriate program. A student may also enroll in summer sessions to make up deficiencies to be reinstated in his program.

If a student wishes to return to the college after his suspension has expired, he will be placed under previous probationary requirements unless deficiencies were removed during the summer session.

ACADEMIC PROBATION AND DISMISSAL

Students failing to maintain the stated cumulative quality point average will be considered on academic probation and may be required to limit their course load. A student may be asked to withdraw from a regular curriculum program if his quality point average drops below the average on the chart.

Any full-time student who fails to pass at least three credit hours during any term is subject to academic dismissal for one term regardless of his quality point standing.

QUALITY POINT AVERAGE TO DETERMINE
CONTINUANCE IN SCHOOL

PARKING

Students are expected to drive carefully and courteously and to abide by all North Carolina traffic regulations while on the campus.

The parking lot in the front of the main building of the college is reserved for faculty and staff. Student cars parked in front of the building or in other unauthorized areas will be given a parking ticket. The first violation of this regulation will incur a warning for the student, for a second violation a two dollar (\$2.00) fine, for the third violation a fine of three dollars (\$3.00). Report all tickets to the Business Office. If he fails to pay the parking ticket, the student will be subject to disciplinary action.

Car registration and display of a Coastal Carolina Community College sticker is required. All students are to register their cars at registration and receive a parking permit decal. Additional decals may be received in the Business Office.

TRANSCRIPT

One transcript will be sent free of charge upon written request from the student.

POLICIES RELATING TO DISRUPTIVE CONDUCT

Coastal Carolina Community College honors the right of free discussion and expression, peaceful picketing and demonstrations, the right to petition and peaceably to assemble. That these rights are a part of the fabric of this institution is not questioned. It is equally clear, however, that in a community of learning, willful disruption of the educational process, destruction of property and interference with the rights of other members of the community cannot be tolerated. Accordingly it shall be the policy of the college to deal with such disruption, destruction or interference promptly and effectively, but also fairly and impartially without regard to race, religion, sex or political beliefs.

DEFINITION OF DISRUPTIVE CONDUCT

Any student, who with the intent to obstruct or disrupt any normal operation or function of the college or any of its components, engages, or invites others to engage, in individual or collective conduct which destroys or significantly damages any college property, or which impairs or threatens impairment of the physical well-being of any member of the college community or which because of its violent, forceful, threatening or intimidating nature or because it restrains freedom of lawful movement, or otherwise prevents any member of the college community from conducting his normal activities within the college, shall be subject to prompt and appropriate disciplinary action, which may include suspension, expulsion or dismissal from the college.

The following, while not intended to be exclusive, illustrate the offenses encompassed herein, when done for the purpose of obstructing or disrupting any normal operation or function of the college or any of its components: (1) occupation of any college building or part thereof with intent to deprive others of its normal use; (2) blocking the entrance or exit of any college building or corridor or room therein with intent to deprive others of lawful access to or from, or use of, said building or corridor or room; (3) setting fire to or by any other means destroying or substantially damaging

premises; (4) any possession or display of, or attempt or threat to use, for any unlawful purpose, any weapon, dangerous instrument, explosive or inflammable material in any college building or on any college campus; (5) prevention of, or attempt to prevent by physical act, the attending, convening, continuation or orderly conduct of any college class or activity or of any lawful meeting or assembly in any college building; (6) blocking normal pedestrian or vehicular traffic on or into any college campus.

NARCOTICS, ALCOHOLIC BEVERAGES, AND STIMULANT DRUGS

A student shall not knowingly possess, use, transmit, or be under the influence of any narcotic drug, hallucinogenic drug, amphetamine, barbiturate, marijuana, alcoholic beverage, or intoxicant of any kind on the college campus during and immediately before or immediately after school hours, or at any other time when the college is being used by any group, or off the college campus at a college activity, function, or event.

Use of a drug authorized by a medical prescription from a registered physician shall not be considered a violation of this rule.

CHEATING

Cheating is against the rules of the college.

DISCIPLINARY PROCEDURES

Cases involving misconduct by students will be handled according to the following procedures in order to insure "due process":

1. The person accused will be provided written notice from the disciplinary action committee of the charges against him.
2. The person accused will be provided a hearing by the Disciplinary Action Committee.
3. The person accused may inspect all affidavits, documents, and other evidence to be used against him.
4. The person accused may have the assistance of legal counsel if desired. (This does not mean that such counsel will be provided at public expense.)

RIGHT OF APPEAL

Any student found guilty by any committee or other school authority of violating any provision, regulation or policy of the college; or who is placed on academic probation or suspension shall have the right to appeal the finding and/or discipline imposed upon him to the president of the college. Any such appeal shall be in writ-

ing, shall be based solely upon the record, and shall be limited to one or more of the following grounds: (1) that the finding is not supported by substantial evidence; (2) that a fair hearing was not accorded the accused; or (3) that the discipline imposed was excessive or inappropriate.

It shall be the responsibility of the president to make prompt disposition of all such appeals, and his decision shall be rendered within thirty (30) days after receipt of the complete record on appeal.

STUDENT PERSONNEL SERVICES

COUNSELING

Professionally trained counselors will assist students at Coastal Carolina Community College with educational, occupational and personal problems. Counseling services are available to every student from pre-admission through graduation. Students are encouraged to seek guidance from the counselors when the need exists.

FACULTY ADVISING

Each full-time student is assigned to a faculty advisor. The advisor assists the student in planning his educational program, registration, and adjustments to college life. Students should periodically check with their advisor concerning their educational progress.

ORIENTATION

New students are expected to participate in an orientation program designed to promote rapid and sound adjustment to the educational philosophy, program, and standards of the college.

HOUSING

The college does not have dormitory facilities. Students wishing to live away from home must arrange their own living accommodations. However, the Student Personnel Office will assist in any way possible to help students find housing accommodations. The college does not assume responsibility for the supervision of housing.

STUDENT HEALTH

The college does not provide medical, hospital, or surgical services. Medical services are available at the emergency room of Onslow Memorial Hospital. A doctor is on call twenty-four (24) hours a day at the hospital.

Students are encouraged to carry accident insurance which is made available through the college at minimum cost.

PLACEMENT

Placement services are available through the Student Affairs Office. Students are encouraged to use these services.

FINANCIAL AID

Coastal Carolina Community College offers a full program of financial aid including scholarships, grants, loans, and jobs. In order to be considered for aid, a student should make application at least four (4) weeks prior to the registration date of the quarter for

which he wishes aid. Students should contact the Financial Aid Officer for additional information on any of the programs listed.

SCHOLARSHIPS AND GRANTS

The Supplemental Educational Opportunity Grants Program is funded by the Federal Government and is for students of exceptional financial need who without this grant would be unable to continue their education. Grants of up to \$1500 are available with a total aggregate of no more than \$4000 over a four (4) year period of undergraduate study (or \$5000 for a five (5) year baccalaureate program). Those students selected for a Supplemental Educational Opportunity Grant (SEOG) will receive additional financial aid under one of the other programs.

LOCAL:

Local Scholarships are made available by the following organizations:

- Coastal Carolina Community College Women's Club
- American Business Women's Association
 - Janerion Chapter
 - El Rio Neuvo Chapter
- Jacksonville Business and Professional Women Club
- Onslow County Hospital Auxiliary
- Staff Noncommissioned Officers Wives' Club
- Rotary Club
- Practical Nursing Scholarship
- Onslow County Dental Society
- Onslow County Medical Society
- Carlyle W. Blomme (Civil Tech.)
- Chief Petty Officers Wives' Club
- Ralph Giddings (Civil Tech.)
- Walter E. Furr Memorial Scholarship

Local loans are made available by the following organizations:

- Jacksonville Kiwanis Club
- Jacksonville Department Store
- New River Pharmacy
- S. E. Wainwright
- The Gene Johnson Memorial Loan
- Auto Mechanics Loan

The Financial Aid Officer can furnish additional information on these loans and scholarships.

LOANS

The National Direct Student Loan Program (NDSL) is funded by the Federal Government and Coastal Carolina Community College with matching shares. Qualified students may obtain loans of up to \$2500 during the first two (2) years with an aggregate loan ceiling of \$5000 as an undergraduate. Graduate or professional students may borrow up to \$2500 each year for four (4) years. The maximum total loan, combining all years of undergraduate and graduate study is \$10,000. Repayment begins nine (9) months after the student terminates at least half-time study and may extend over a ten (10) year period. Interest charges of three (3) percent also begin at the start of the repayment period. No repayment is required and no interest is charged for any period up to three (3) years during which the student is serving in the Armed Forces, Peace Corps, or VISTA. The program also provides for partial or total loan cancellation for students who enter the field of teaching the handicapped and disadvantaged or pre-school programs carried out under the Head Start Program.

The Insured Student Loan Program allows residents of North Carolina to borrow up to \$2500 per academic year through College Foundation, Inc., with funds provided by the North Carolina banking and life insurance industries. Loans are insured by the State Education Assistance Authority; and under certain circumstances, the Federal Government will pay the interest during the study and grace periods.

James E. and Mary Z. Bryan Foundation Student Loan Plan

Legal residents of North Carolina enrolled full time in undergraduate programs may borrow up to \$750 per semester or \$500 per quarter for a total of \$1,500 per school year for an aggregate of \$6,000 through College Foundation, Inc. The interest rate is 1 percent during the in-school and grace periods and 6 percent during the repayment period. Apply through the institution's financial aid office.

EMPLOYMENT OPPORTUNITIES

The College Work-Study Program is funded by the Federal Government and Coastal Carolina Community College with matching shares. The program assists qualified students by providing job opportunities at the college itself or at a public or private non-profit agency—such as a school, a social agency, or a hospital—working in cooperation with the college. A student may work an average of fifteen (15) hours weekly while classes are in session and forty (40) hours per week during the summer or other vacation periods. In general, the salary is at least equal to the current minimum wage, although it is frequently higher.

VETERANS ADMINISTRATION BENEFITS

The college is approved for the training of Veterans, war orphans, children of totally disabled veterans; or a widow of any person who died of service-connected disability, or wife of any veteran with total disability of a permanent nature resulting from service connected disability. Eligible persons seeking such benefits should contact the college, be accepted for a program of study, and then seek counseling from the local Veterans Affairs Officer.

To receive full benefits under the G. I. Bill, the student must carry a full academic load (12 credit hours for college transfer or AAS Degree programs, 30 contact hours per week for vocational programs).

Contact hours shown in this catalog are minimal, and it is the policy of this institution to permit students to enroll in additional courses and lab work in order to broaden their training. When in any quarter the total weekly contact hours listed are fewer than the amount required for full-time certification, a student may, on request, enroll for additional instructional hours provided such hours are deemed by the institution to be consistent with an appropriate to the student's overall program.

VOCATIONAL REHABILITATION ASSISTANCE

Certain handicapped students are eligible for aid administered through the Division of Vocational Rehabilitation, N. C. Department of Public Instruction. Those who seek aid should make application to the local Division of Vocational Rehabilitation.

SOCIAL SECURITY BENEFITS

Some students may qualify for financial assistance through their parents' Social Security benefits. Those seeking such aid should first contact their local Social Security Office.

STUDENT ORGANIZATIONS AND ACTIVITIES

The college encourages student participation in student organizations and activities. Although student activities are viewed as secondary to the central purpose of academic preparation, they are nevertheless an important phase of student growth and development. A faculty sponsor is required for each student group and organization.

The groups currently functioning on the campus are:

STUDENT GOVERNMENT ASSOCIATION

The Student Government Association is designed to promote the general welfare of the college in a democratic fashion and to facilitate communication between the student body, the faculty, and the administration. The student council provides a means through which students can promote interest in student activities both on and off campus.

PUBLICATIONS

A college newspaper, THE COLLEGIATE, is published monthly by a student staff.

A literary magazine, THIS END UP is published periodically by a student staff.

THE SPANISH CLUB

The Spanish Club, founded in 1970, is sanctioned by the SGA. Its purpose is to promote fellowship among students of the Spanish language with special emphasis on enhancing familiarity with it and with the traditional customs of the Spanish communities.

HEALTH OCCUPATIONS CLUB

The Health Occupations Club is an interdisciplinary club formed to provide professional growth for each member and to promote health consciousness in the school and in the community through various projects and activities.

THE ACT ONE CLUB

The Act One Club is the Drama organization whose purpose it is to develop student interest and talent and serve as a showcase for it. Student members meet together regularly, and participate in actual theater productions.

CHEERLEADING

A cheerleading squad is organized each year to provide cheers for the basketball team at both home and out-of-town games. Selections are made by a committee of four (4) faculty members plus the President of the Student Government Association. Any boy, or girl who is a full-time student is eligible to "try-out" for the cheerleading squad. Every candidate must "try-out" each year regardless of previous squad membership. Academic eligibility, and full-time status must be maintained.

ATHLETIC PROGRAM

The emphasis on the Athletic program at the Coastal Carolina Community College is three-fold: intercollegiate competition, intramural activities, and extra-mural activities. This emphasis is for the purpose of encouraging full-student participation.

1. **Intercollegiate Athletics**—The “Cougars” are members of the North Carolina Community College Athletic Association, in which they participate in basketball and baseball. Plans in the future contain teams participating in cross-country, tennis, and golf as the new facilities develop. The Cougars also participate against other 2 year schools as well as freshman or junior varsity teams from senior institutions. To be eligible to represent the college as a player or manager in intercollegiate athletics, students must meet the eligibility requirements of the N.C.C.C.A.A. and District X of the National Junior College Athletic Association. A faculty athletic committee exercises immediate supervision of the intercollegiate program.
2. **Intramural Activities**—The intramural program at CCCC is designed to meet the needs of those students who do not wish to, or are unable to compete on the intercollegiate level. The program involves participation in team sports, dual-activities, and individual sports. These activities include: touch-football, basketball, softball, volleyball, cross-country, golf, tennis, bowling, badminton foot-ball, deck tennis, horse-shoes, and archery. Many of the activities are co-recreational as well as for men, and for women.
3. **Extra-Mural Activities**—All extra-mural activities (intramurals between schools) are sanctioned by the N.C.C.C.A.A. Plans call for tournaments to be held in the fall and spring at which time the intramural winners from conference member schools will compete against each other. In addition, some team activities for women will be conducted between other schools.

PROGRAMS OF STUDY

Coastal Carolina Community College offers the following programs of study. The courses listed in each curriculum are required. However, they may not always be taught during the quarter indicated. A student should confer with his educational counselor concerning course schedules. A schedule of courses offered will be published each quarter. The college reserves the right to postpone offering a curriculum which has an insufficient number of applicants.

COOPERATIVE EDUCATION PROGRAM

The Cooperative Education Program provides the opportunity for students to gain study-related experience in business, industry, government, and service agencies. It is a program of inter-related work and study which combines work experience with classroom studies. It is a joint venture between the college and cooperating employers to form a total educational program for the student.

The student enrolled in the Cooperative Education Program takes the same academic courses as the regular curriculum student. In addition to his academic courses, the student participates in a supervised work experience which is planned, progressive, and closely related to his curriculum and career interest.

The Cooperative Education Program allows the student opportunities to apply classroom knowledge in actual work situations, to work with and observe people of varied backgrounds and disciplines, to earn money to defray a portion of his educational expenses, and to explore possibilities of permanent employment after completion of his college studies.

Students interested in participating in the Cooperative Education Program should contact the Cooperative Education Office promptly.

CURRICULUM OUTLINES AND GRADUATION REQUIREMENTS

The general requirement that a student have at least a “C” (2.0) overall average applies to all curricula.

COLLEGE TRANSFER DIVISION ASSOCIATE IN ARTS DEGREE

COLLEGE TRANSFER PROGRAM

The College transfer program is designed to parallel the freshman and sophomore years of study of a senior college or university.

The course requirements of colleges and universities differ in the nature and number of required courses. In order for students to experience ease of transfer it is suggested that the student select the particular curriculum which best suits his educational objectives. It is also suggested that the student acquire a catalog from the college or university he plans to attend.

The college counseling staff and faculty advisors are available for student conferences in course selection. However, it is the responsibility of the student to familiarize himself with the requirements of the senior institution to which he plans to transfer.

Any substitution of courses for those listed in the programs of study must have the approval of the Dean of College Transfer Education and the Dean of Student Affairs.

The Associate in Arts candidate will be expected to complete the following general education courses or equivalent with additional approved electives for a minimum of 96 credit hours. Ninety (90) credit hours must be in academic subjects.

LIBERAL ARTS CURRICULUM

The Liberal Arts Curriculum is designed for students who plan to transfer to a liberal arts curriculum at a four-year college or university

	Quarter	Hours	Credit
English 101-102-103			9
English Literature 201-202			10
History 101-102-103			9
Mathematics 102-103-or 111-112			10

**PHYSICAL EDUCATION COLLEGE
REQUIREMENT**

All full-time, college transfer students twenty-six (26) and under, are required to take two (2) years or six (6) quarter-hour credits of physical education one of which must be PED 101, Physical Conditioning. The only students exempted from this requirement are:

1. Those who are physically, unable to meet this requirement and present a written medical exemption from their physician to the college registrar.
2. Those students twenty-seven (27) years of age and over, in which case the physical education requirement will be one (1) year or three (3) quarter hours credits. PED 101 is not a requirement.

DEVELOPMENTAL STUDIES PROGRAM

Developmental programs are offered to prepare students for admission to the college transfer program and to the technical program. They are designed to help develop the basic skills necessary to succeed in other programs of the college.

A student is placed in the developmental program after a close analysis of his high school transcript, test scores, and other information on his level of achievement. The program provides an opportunity to gain needed knowledge and skills for an individual who is not fully prepared for entry into an Associate Degree curriculum because he has not had an opportunity to complete an appropriate educational course or program or because he has low achievement in his previous educational programs.

Through the use of specialized teaching methods and equipment, the student may, through concentrated effort in the areas of his weakness, progress at his own rate. The student will be tested frequently for the purpose of finding the progress he is making.

OCCUPATIONAL DIVISIION
ASSOCIATE IN APPLIED SCIENCE PROGRAMS

ACCOUNTING

Accounting is a growing professional field. Its requirements are high and its rewards are equally high. The Accounting Curriculum is designed to make the student employable in this specialized field of business.

The student, to be successful, should have a sound background in mathematics and English. A logical mind and problem-solving ability are assets.

CURRICULUM OBJECTIVES

1. General knowledge of accounting as a professional.
2. Specific knowledge of accounting procedures, principles, postulates, assumptions and connections.
3. General knowledge of business. Specific areas are law, finance, economics, data processing, marketing and management.
4. Machine skills.
5. Reinforcement in math and English.

GRADUATE PROSPECTS

The accounting graduate can expect employment opportunities to be numerous. These range from basic bookkeeping to assistant controller positions. Regardless of where the graduate starts his career in accounting, he will find the opportunities for advancement to be limited only by his desire and ability.

ARCHITECTURAL TECHNOLOGY

This program is designed to provide men and women with knowledge and skills that will support a broad area of employment potential with the main emphasis toward the architectural office. Technical courses are included which will enable the graduate to advance in technical knowledge and proficiency as job experience is obtained. Related subjects are included to enhance and support this program.

The educational requirements for this program are based on a study completed by the Educational Task Force for Architectural Technician Training of the American Institute of Architects. An Architectural Technician Advisory Committee, composed of local architects from this area, aid in keeping this program current and up to date.

Architectural technicians may be concerned with turning the architect's design sketches into complete and accurate working drawings. These technicians may also obtain jobs in other related fields such as engineering, contracting, building materials manufacturing, distribution and sales. Other areas of job opportunities may be found in architectural rendering, model building, and landscape architecture. The opportunity for diverse employment in this field is phenomenal.

The technician may be involved in work requiring a knowledge of building codes, specifications and contract documents. He or she must be able to communicate graphically with other people and will spend much time studying the graphics of architecture.

The diversity and size of architectural projects and services require a corresponding variety to supporting personnel. The impact of data processing, computer aids and an accelerated technology in architecture is continuing to create new demands and job opportunities.

After graduation in this curriculum, two years of architectural office experience and the completion of courses in continuing education are the prerequisites for letters of recommendation from the technician's employer which may lend to certification as an Architectural Technician by the American Institute of Architects.

BUSINESS ADMINISTRATION

INTRODUCTION

The Business Administration Curriculum is designed to prepare the student for employment in one of many occupations common to business. Training is aimed at preparing the student in many phases of administrative work that might be encountered in the average business.

The specific objectives of the Business Administration Curriculum are to develop the following competencies:

1. Understanding of the principles of organization and management in business operations.
2. Understanding our economy through study and analysis of the role of production and marketing.
3. Knowledge in specific elements of accounting, finance, and business law.
4. Understanding and skill in effective communication for business.
5. Knowledge of human relations as they apply to successful business operations in a rapidly expanding economy.

The graduate of the Business Administration Curriculum may enter a variety of career opportunities from beginning sales person or office clerk to manager trainee. The duties and responsibilities of this graduate vary in different firms. These encompassments might include: making up and filing reports, tabulating and posting data in various books, sending out bills, checking calculations, adjusting complaints, operating various office machines, and assisting managers in supervision. Positions are available in businesses such as advertising; banking; credit; finance; retailing; wholesaling; hotel, tourist, and travel industry; insurance; transportation; and communications.

CIVIL ENGINEERING TECHNOLOGY

(Option in Surveying)

INTRODUCTION

PURPOSE OF CURRICULUM

Construction technicians perform many of the planning and supervisory tasks necessary in the construction of highways, bridges, power plants, industrial buildings and utilities. In the planning stages of construction they may be engaged in estimating costs, ordering materials, interpreting specifications, computing earthwork cuts and fills and storm drainage requirements, surveying or drafting. Once the actual construction work has begun, many technicians perform supervisory functions. Some may be responsible for seeing that construction activities are performed in proper sequence, and for inspecting the work as it progresses for conformance with blueprints and specifications.

The expanding construction industry needs up-to-date technically trained personnel. The objective of the Civil Technology Program is to train technicians who will work with skilled craftsmen and engineers in performing the various functions included in the broad field of construction. This curriculum provides the necessary basic background and related theory with specific skills needed in the construction field. Basic construction knowledges and skills are supplemented by courses in Communication Skills, Economics, Industrial Organization and Management, and Human Relations.

DENTAL HYGIENE

The Dental Hygiene Program provides a variety of experiences in classroom, laboratory, and clinical procedures in preparation for the responsibilities of the profession of Dental Hygiene. The dental hygienist is an integral part of the oral health team and her duties include providing preventive care and oral hygiene education to groups and individuals. In addition to being employed in private practice, the dental hygienist may elect to practice in hospitals, institutions, industry, the military services, the Peace Corps and with further educational qualifications she can enter the field of teaching or service in public health at a local, state, or national level.

The dental hygienist is recognized by law in all of the states and in the District of Columbia and as the national health program expands there will be an increasing need for trained professionals in the field of dental hygiene.

Upon completion of this two year program, graduates will receive an Associate in Applied Science Degree and will be eligible to make application for the licensing examination given by the North Carolina State Board of Dentistry for practice in North Carolina.

Dental Hygiene applicants must take the Dental Hygiene Aptitude Test sponsored by the American Dental Hygienists' Association and high school credits in chemistry, algebra, and biological sciences are required. Applicants will be interviewed by members of the Dental Hygiene Faculty prior to formal acceptance.

*MANIPULATIVE LABORATORY: Involves development of skills and job proficiency. Credit of one quarter hour for each three hours of laboratory.

ELECTRONIC DATA PROCESSING

This curriculum is designed to give the student (1) an understanding of the principles of business operation and/or scientific techniques in problem solving, (2) experience in handling computers and in using programming techniques to solve assigned problems, (3) facility in using specialized problem-solving techniques where necessary, (4) ability to properly document his work and to communicate efficiently with concerned personnel.

The data processing specialist applies programming techniques which are compatible with his computer to defined problems with minimum supervision. He analyzes and defines system requirements to develop a program for electronic data processing; conducts detailed analyses of systems requirements; develops all levels of block diagrams and logical flow charts; translates program details into coded instructions; establishes test data; tests, refines, and revises programs and documents procedures. He ascertains if other combinations of instructions would achieve greater flexibility, better machine utilization, or more dependable results. He may prepare a complete set of operating instructions for use by a console operator; on occasion, operates the console in processing program.

EXECUTIVE SECRETARY

INTRODUCTION

The demand for better qualified secretaries in our ever-expanding business world is becoming more acute. The purpose of this curriculum is to outline a training program that will provide training in the accepted procedures required by the business world and to enable persons to become proficient soon after accepting employment in the business office.

The Executive Secretary Curriculum is designed to offer the students the necessary secretarial skills in typing, dictation, transcription, and terminology for employment in the business world. The special training in secretarial subjects is supplemented by related courses in mathematics, accounting, business law, and personality development.

The graduate of the Executive Secretary Curriculum should have a knowledge of business terminology, skill in dictation and accurate transcription of business letters and reports. The graduate may be employed as a stenographer or a secretary. Stenographers are primarily responsible for taking dictation and transcribing letters, memoranda, or reports. The secretary, in addition to taking and transcribing, is given more responsibility in connection with meeting office callers, screening telephone calls, and being an assistance to an executive. She may enter a secretarial position in a variety of offices in businesses such as insurance companies, banks, marketing institutions, and financial firms.

Students in this curriculum may, if they qualify, elect to take Machine Shorthand in lieu of Gregg Shorthand.

LEGAL SECRETARY

INTRODUCTION

The demand for better qualified legal secretaries in our ever-expanding legal profession is becoming more acute. The purpose of the Legal Secretary Curriculum is to outline a training program that will provide specialized training in the accepted procedures required by the legal profession, and to enable persons to become proficient soon after accepting employment in the legal office.

The curriculum is designed to offer the students the necessary secretarial skills in typing, dictation, transcription, and terminology for employment in the legal profession. The special training in secretarial subjects is supplemented by related courses in mathematics, accounting, business law, and personality development.

The graduate of the Legal Secretary Curriculum should have a knowledge of legal terminology, skill in dictation and accurate transcription of legal records, reports, letters, and documents. The duties of a legal secretary may consist of: taking dictation and transcribing letters, memoranda and reports, meeting office callers and screening telephone calls, filing, and scheduling appointments. Opportunities for employment of the graduate exist in a variety of secretarial positions in the legal profession such as in lawyers' offices and state and government offices.

POLICE SCIENCE

Today's law enforcement officer must be knowledgeable in many areas if he is to function effectively in our complex society. He is expected to handle matters dealing with human relations, often handled by those trained in the behavioral sciences, he frequently has to act in legal matters requiring trained law personnel much deliberation to resolve; he must be skilled in the most recent operational techniques in order to insure equality of justice to all.

To this end, the Police Science Program is dedicated to the purpose of developing proficiency in both preservice high school graduates and in-service law enforcement personnel. Its development is based on present and future educational needs. It offers theoretical and practical instruction to meet the requirements of various law enforcement agencies and provides the student with the skills, knowledge, and attitudes necessary for employment in the law enforcement profession.

There is an increasing demand for properly trained law enforcement officers in industry, municipal, county, state and federal agencies, and there is every reason to believe that the highly trained law enforcement officer will find challenging opportunities with public and private law enforcement services.

Law enforcement is that important division of government which is assigned the power and responsibility to maintain order and enforce law. Its basic functions may be classified as prevention of crime, suppression of criminal activity, apprehension of offenders, preservation of the peace, regulation of noncriminal conduct, and the protection of life and property.

To the original and primary police functions of preserving the peace and maintaining law and order, the ever widening scope of government activity has added a host of other duties to the various law enforcement agencies, ranging from the regulation of traffic and the suppression of vice to the enforcement of minor laws and ordinances that regulate the minutiae of business and private life in a modern society.

AIR CONDITIONING AND REFRIGERATION

INTRODUCTION

The present day demands from industry for qualified mechanical experts in all areas of air conditioning and refrigeration are greater than ever before. The curriculum given at Coastal Carolina Community College is designed to equip young men to help meet the needs of industry.

The program includes a comprehensive study of the theory and fundamentals of refrigeration, heating and air conditioning. The student is given an understanding of the functions of the mechanical equipment that is used. Emphasis is placed on manipulative skills, installation and service procedures as well as exercise and training in practical thinking.

Mathematics, English and Social Studies are included in this curriculum to better equip the student to take his proper place in society and industry.

The Air Conditioning and Refrigeration curriculum prepares graduates as installation and service mechanics. He will have had training in pipe work, metal work and insulation and with experience should be able to progress to foreman or a supervisory position. Plant maintenance in industry and government provide attractive possibilities.

AUTO BODY REPAIR

The field of automotive body repair and painting needs many well-trained people to meet the growing demand for the many special skills in this area of employment. In this program, much of the students' time in the shop is devoted to learning skills and practicing these skills on car bodies and their component parts. Every attempt is made to make these practical experiences as close as possible to actual on-the-job situations. The practical experience and related training provide an ideal way to prepare the students for entry into an occupation that offers many job opportunities.

Graduates of the Auto Body and Fender Repair Curriculum are qualified for jobs in which they remove dents in automobile bodies and fenders; take off fenders and replace them with new ones; straighten frames, doors, hoods, and deck lids; and align wheels. In their work these craftsmen operate welding equipment. Auto body repairmen shrink stretched metal and prepare it for painting. They are called on to paint fenders and/or panels as well as to paint a complete vehicle. In addition to these duties, auto body repairmen remove, fit and install glass. They are required to remove and install interior trim; install headlinings and seat covers; and replace fabric tops of vehicles. This type of employment includes reading and interpreting blueprints, charts instruction and service manuals, and wiring diagrams. These repairmen also prepare orders for repairs and parts as well as estimates and statements for adjusters. After gaining experience, many of these craftsmen open their own businesses or become body shop foremen, supervisors, or managers.

AUTOMOTIVE MECHANICS

This curriculum provides a training program for developing the basic knowledge and skills needed to inspect, diagnose, repair or adjust components of automotive vehicles. Manual skills are developed in practical shop work using components mounted on stands. Thorough understanding of the operating principles involved in the modern automobile comes in class assignments, discussion, and shop practice. Diagnosing and repair work is assigned on scheduled vehicles.

Complexity in automotive vehicles increases each year because of scientific discovery and new engineering. These changes are reflected not only in passenger vehicles, but also in trucks and buses powered by a variety of internal combustion engines. This curriculum provides a basis for the student to compare and adapt to new techniques for servicing and repair as vehicles are changed year by year.

Automobile mechanics diagnose, maintain, and repair mechanical, electrical, and other component parts of passenger cars, trucks, and buses. In some communities and rural areas they also may repair body parts, service tractors, marine engines and other types of equipment. Mechanics inspect and test to determine the causes of faulty operation. They repair or replace defective parts to restore the vehicle or machine to proper operating condition. They use shop manuals and other technical publications to assist in analysis, disassembly and assembly of component parts.

Automotive mechanics in smaller shops usually are general mechanics qualified to perform a variety of repair jobs. A large number of automobile mechanics specialize in particular types of repair work, such as repairing only electrical components, power steering, power brakes, or automatic transmissions. Usually, such specialists have had "all-around" training in general automotive repair.

A diploma may be awarded for the successful completion of a Six-Quarter Program.

DENTAL ASSISTANT

Dental assisting is one of the fastest growing occupations for women today. The role of the dental assistant has evolved from that of receptionist only to that of a fully participating member of the dental team; primary emphasis is on chairside assisting, although she continues to perform numerous duties related to office management, patient relations, and laboratory procedures. The dental profession now recognizes the contribution the dental assistant can make to extension of services and increased productivity of the dental office. Projected needs call for a fivefold expansion in numbers of graduates and continued improvement in the quality of training programs.

The specific objectives of the Dental Assistant Curriculum are to develop the following competencies:

1. Understanding of procedures and beginning skills of dental office management.
2. Understanding of principles and beginning skill in the procedures of chairside assisting, including effective patient relationships.
3. Understanding of principles and beginning skills in performance of selected laboratory procedures commonly carried out in the dental office.

The duties of the dental assistant vary somewhat, depending on the number of auxiliary workers employed. In some offices the assistant is responsible for all three areas described below; in others, she may be responsible for only one area.

In rendering chairside assistance to the dentist, the dental assistant is responsible for placing instruments for use, keeping the operating field clear during treatment, preparing restorative materials and dental cements, passing materials and instruments during dental procedures, applying fluorides and topical anesthesia under direction of the dentist and complete sterilization of instruments and cleanliness of operatory after use. In the laboratory of the dental office, she may make models of the teeth and mouth, cast inlays and crowns, expose and process x-ray films and mount finished x-rays. In acting as office manager and receptionist, she receives patients, arrange appointments, records treatments, keeps accounts, maintains inventories, and orders supplies.

ELECTRICAL INSTALLATION AND MAINTENANCE

The rapid expansion of the national economy and the increasing development of new electrical products is providing a growing need for qualified people to install and maintain electrical equipment. By mid-1960 more than 350,000 were employed as either construction electricians or maintenance electricians. Between 5,000 and 10,000 additional tradesmen are required each year to replace those leaving the industry. The majority of the electrical tradesmen today are trained through apprenticeship or on-the-job training programs.

This curriculum guide will provide a training program in the basic knowledge, fundamentals, and practices involved in the electrical trades. A larger portion of the program is devoted to laboratory and shop instruction which is designed to give the student practical knowledge and application experience in the fundamentals taught in class.

The graduate of the electrical trades program will be qualified to enter an electrical trade as an on-the-job trainee or apprentice, where he will assist in the planning, layout, installation, check out, and maintenance of systems in residential, commercial, or industrial plants. He will have an understanding of the fundamentals of the National Electrical Code regulations as related to wiring installations, electrical circuits, and the measurements of voltage, current, power, and power factor of single and polyphase alternating circuits. He will have a basic knowledge of motor and motor control systems; industrial electronic control systems; business procedures, organization, and practices; communicative skills; and the necessary background to be able to advance through experience and additional training through up-grading courses offered in the center.

MASONRY

Masons are the craftsmen in the building trades that work with artificial stone, brick, concrete masonry units, stone and the like. During the past decade there has been a steady increase in the demand for these craftsmen. As building construction continues to increase the demand for bricklayers, cement masons, and stonemasons will also increase.

This curriculum in Masonry is designed to train the individual to enter the trade with the knowledge and basic skills that will enable him to perform effectively. He must have a knowledge of basic mathematics, blue print reading and masonry technology. He must know the methods used in laying out a masonry job with specific reference to rigid insulation, refractories, and masonry units specified for residential, commercial and industrial construction.

Most employment opportunities for masons may be found with contractors in new building construction. However, a substantial portion of masons are self-employed or work with contractors doing repair, alteration, or modernization work.

Most masons are employed by contractors in the building construction fields to lay brick, and blocks made of tile, concrete, gypsum or terra cotta. Also, he constructs or repairs walls, partitions, arches, sewers, furnaces and other masonry structures.

After gaining experience in the various types of masonry trade along with leadership training, it is possible for the tradesman to become a foreman, inspector and eventually a contractor.

PRACTICAL NURSE EDUCATION

The aim of the Practical Nurse Education Program is to prepare safe, efficient, well-informed practitioners of nursing, qualified by education and supervised experience, to assist in the care of patients of all ages, having a variety of disease conditions and in varying degrees of dependency.

Job requirements for Licensed Practical Nurses include suitable personal characteristics, ability to adapt knowledge and understanding of nursing principles to a variety of situations, technical skills in performing bedside nursing, appreciation of the worth and individual differences of people, the desire to serve and help others and readiness to conform to the requirements of nursing ethics and hospital policies. Evidence of the above attributes is sought in applicants to the program.

Student selection is based upon high school achievement, character references, results of preentrance tests designed to determine aptitudes and knowledge necessary to succeed in nursing, and personal interviews with members of the nursing faculty. Applicants must have physical and dental examinations and be in optimum physical and emotional health.

Throughout the one year program, students must demonstrate continuous growth in knowledge, understanding and skills related to nursing, biological and social sciences, communications and interpersonal relationships. Written tests on course content, oral and written assignments, nursing care plans and ability to participate in class discussion are among the evaluation tools used throughout the length of the program. In clinical situations, students are evaluated on appropriateness of nursing action, demonstration of good judgment, ability to apply theoretical knowledge to specific situations, ability to assume responsibility and vocational and interpersonal relationships. Passing grades on all nursing courses, in sequence, and demonstrated progress in application of nursing skills are required to remain in the program.

Graduates of the Practical Nurse Education Program are eligible to take the licensing examination given by the North Carolina Board of Nursing. This examination is given twice a year, usually in April and September. Satisfactory achievement on this examination entitles the individual to a license to practice nursing in the State of North Carolina and to the legal use of the title Licensed Practical Nurse. Practical Nurses licensed in North Carolina can apply for licensure in other states without repeating the examination, provided their examination score meets the requirements of the state to which they are applying.

RADIO AND TELEVISION SERVICING

Within recent years improved electronic techniques have provided expanded entertainment and educational facilities in the form of monochrome and color television, frequently modulated radio, high fidelity amplifiers and stereophonic sound equipment. These developments require expanded knowledge and skill of the individual who would qualify as a competent and up-to-date serviceman.

This curriculum guide provides a training program which will provide the basic knowledge and skills involved in the installation, maintenance and servicing of radio, television and sound amplifier system. A large portion of time is spent in the laboratory verifying electronic principles and developing servicing techniques.

A radio and television serviceman may be required to install, maintain and service amplitude modulated and frequency modulated home and auto radios, transistorized radios, monochrome and color television sets, intercommunication, public address and paging systems, high fidelity and stereophonic amplifiers, record players and tape recorders.

His work will require meeting the public both in the repair shop and on service calls. A serviceman who establishes his own business will also need to know how to maintain business records and inventory.

WELDING

This curriculum was developed to fill the tremendous need for welders in North Carolina. The recently completed Manpower Survey shows quite clearly that many welders will be needed annually to fill present and projected vacancies in the State.

The content of this curriculum is designed to give students sound understanding of the principles, methods, techniques and skills essential for successful employment in the welding field and metals industry.

The field of welding offers a person prestige, security and a future of continuous employment with steady advancement. It offers employment in practically any industry: shipbuilding, automotive, aircraft, guided missiles, railroads, construction, pipe fitting, production shop, job shop and many others.

Welders join metals by applying intense heat and sometimes pressure, to melt the edges to form a permanent bond. Closely related to welding is "oxygen cutting." Of the more than 35 different ways of welding metals, arc, gas, and resistance welding are the three most important.

The principal duty of the welder using manual techniques is to control the melting by directing the heat from either an electric arc or gas welding torch, and to add filler metal where necessary to complete the joint. He should possess a great deal of manipulative skill with a knowledge of jigs, welding symbols, mathematics, basic metallurgy, and blueprint reading.

DEVELOPMENTAL BUSINESS
INTRODUCTION

The Developmental Business Program is an integrated, student-centered program of instruction designed to increase the likelihood of success for students who enter this institute with academic deficiencies. The goal of this program is to develop academic ability of every entering student to the extent that he has an average likelihood of success in one of the regular business curricula areas.

Students are initially assigned to courses appropriate to their desires, to their tested abilities, and as deemed proper by their counselors. As each student progresses, he is permitted to develop at his own speed, in classes which are within his level of competence.

As the individual student displays sufficient competence in an area of study he is guided to the next higher level of study, that is, into a study which holds challenge for the student and which will contribute to his academic, technical, or vocational development.

Each student is encouraged to progress to his utmost capability, and upon completion of the program is permitted to select a curriculum consistent with his proved performance.

The Developmental Business courses combine academic courses and laboratory/shop instruction to provide students with integrated theory—procedures and practical applicatory understanding of the subject matter requisite to regular curricular success.

Students may spend from one quarter to three quarters, or more, in the Developmental Business Program. However, normally, the student will stay in the program for three quarters (one academic year).

		Hours Per Week		Quarter
		Class	Lab	Hours Credit

ADULT-EXTENSION EDUCATION AND COMMUNITY SERVICE PROGRAMS DIVISION OF CONTINUING EDUCATION

General Information: An important function of Coastal Carolina Community College is to provide educational opportunities to all adults in the area. The Division of Continuing Education does this by providing opportunities for adults to return to school to pick up where they left off in their educational programs. In addition, this Adult-Extension Programs offers opportunities in **up-grading courses, skills improvement and completion of high school education.** More than this, the program provides for all adults a general education program which will help them better understand the nature of the changing world and its implications on their community.

Adult-Extension Classes are offered both on and off campus, usually during the evening hours, but can be held at any time. To meet the increasing demand for adult-extension courses, additional classrooms are required off-campus. Therefore, a cooperative agreement has been made between the Board of Education of Onslow County and Coastal Carolina to use designated public school facilities. Classes may be organized in other locations where suitable facilities are made available.

Coastal Carolina Community College will establish appropriate classes where needs arise in cooperation with local officials at any suitable location in Onslow County.

Where Adult-Extension Classes are established, the most qualified teacher available will be employed by the College to teach and act as liaison between the Dean of Continuing Education in the operation of the class.

Announcements concerning dates and times of classes will be made separately for each class, usually in the weekly "Coastal Carolina Continuing Education" bulletin in the local paper on Wednesdays. Coastal Carolina Community College reserves the right to limit class enrollment and to cancel any classes for reasons beyond its control.

At least ten (10) persons must enroll to begin a class. If the average attendance of a class falls below six (6) at anytime, the class shall be discontinued. If a need arises for class in your area, call Dean of Continuing Education, Coastal Carolina Community College, telephone 455-1221.

Eligibility: To enroll in courses offered in the Adult-Extension Education Program, a person must be at least eighteen (18) years of age or if under eighteen (18), not in high school.

Academic Credit: Generally courses offered in the Adult-Extension Program are non-credit. However, credit will be given in the Adult High School Diploma Program. Certificates may be awarded students who successfully complete certain vocational-extension programs.

When Courses Will Begin: May be started at anytime to meet certain needs. The time and dates for registration for courses, generally will be announced separately in "Coastal Carolina Continuing Education" bulletin, found in the local Wednesday paper.

Time of Class Meetings: Most classes meet between the hours of 3:30 p.m. and 9:30 p.m. daily, except Saturdays, most class periods will be three (one-half-hours) in length, some classes may be longer. Schedules showing place, time, and dates will be published each time separately.

To Register: Normally, registration for classes offered will be on the first night of class. Registration is on a first come first serve basis.

Attendance: Students are encouraged to attend all classes. In order for a student to be presented an Attendance Award, he must attend at least eight (80) per-cent of the classes as well as successfully complete the prescribed course.

Fees: There is a nominal fee for Continuing Adult Classes. However, where machines such as typewriters, sewing machines, and etc., a small rental fee is charged.

Self-Supporting Programs: Certain seminars, cultural exhibits and similar programs may be organized on a self-supporting basis. The only income from fees for such programs must defray the expenses. Self-supporting classes in recreational or vocational courses may be organized upon approval of the Department of Community Colleges.

Counseling: Adults who desire counseling regarding thier education or career plans should contact the Dean of Student Personnel Services.

GENERAL ADULT EDUCATIONAL PROGRAMS:

GA-1- ADULT BASIC EDUCATION: The program of Adult Basic Education is essentially designed to improve an adult's ability to speak, read and write the English language. Other areas such as arithmetic, science, and social studies are included in the instructional program.

Specifically, the objectives of the Adult Basic Education are:

(a) Provide instruction for those individuals who have attained age eighteen (18) and whose inability to read and write the English language constitutes a substantial impairment of their real ability.

(b) Provide instruction in the basic education skills for those individuals who have attained eighteen (18) years of age, who are in need of this training to enable them to function to the fullest of their realistic potential as citizens.

(c) Improve their ability to benefit from occupational training, and

(d) Increase their opportunity for more productive and profitable employment.

In accordance with the North Carolina plan for Adult-Basic Education, first priority will be given to persons functioning at the fifth grade level or below. Second priority will be given to persons functioning above the fifth and through the eighth grade level.

The program is based upon the philosophy that every individual, regardless of the status of his functional level, should have the opportunity to participate in continuing educational activities. The philosophy further incorporates the belief that every individual is teachable, trainable, and can realize self-improvement.

Through the cooperation of local community agencies and organizations, facilities should be available without cost. According to the policy of the State Board of Education, no charge is made for adults enrolled in the adult basic education program.

Class locations are established throughout the area and are open to all interested adults. In such cases where special interest warrants the establishment of a new class, the institution will attempt to provide such instruction.

GA-2- ADULT HIGH SCHOOL DIPLOMA PROGRAM

The Program: This program offers an Adult High School Diploma which is issued by the Onslow County School Board upon recommendation from the institute that the student has completed the prescribed course of study. A student may transfer credit for course credit earned in a public high school if he can show a transcript so stating. The courses required for completion are:

English I	General Science
English II	American History
English III	Government or Civics
English IV	Biology
General Mathematics	

Electives to bring total units to sixteen (16)

Grades nine (9) through twelve (12)

The students may purchase their own texts at the small charge our bookstore must make for them.

Classes in all areas of the High School Program can be and are being offered all over Onslow County.

To have courses in the High School Program offered in your area of the county at no expense to you (other than text books where one is required) call Dean of Continuing Education, Coastal Carolina Community College.

High School Entrance Requirements: Adults must be eighteen (18) years of age or older. Each enrollee must have completed the eighth grade, or have a transcript from an accredited high school showing courses and years of work completed, or make a satisfactory score on the placement record.

Organization of High School Classes: Classes are held on-campus or at the on-campus Learning Laboratory daily, Monday through Friday, and at nights 6:30 P.M. to 9:30 P.M., Monday through Thursday. Classes at Adult-Extension locations will be announced separately.

High School Equivalency Examination: Another program for the adult who has not completed high school is the High School Equivalency Program. Through the Programmed Learning Laboratory and other secondary classes, the student may prepare himself to take the General Development Tests. Upon achieving an acceptable score in the areas of English expression, literature, mathematics, social studies, and natural science a student may be awarded a High School Equivalency Certificate by the North Carolina State Department of Education. This certificate is generally accepted on the same basis as the High School Diploma for entrance into college, employment, or promotion. For information contact the office of the Dean of Student Personnel.

GA-3- ADVANCED ACADEMIC COURSES

Advanced academic education provides adults with general courses to widen horizons and create new dimension in thinking and acting. Some of the courses offered in this area are as follows:

- | | |
|----------------------------|----------------------------|
| Modern Math for Parents | English Improvement and |
| Literature | Vocabulary Building |
| Logic: Argument and Debate | Seminar: Human Resources |
| Behavioral Psychology | and Manpower |
| Conference Leadership and | Current Trends in Science |
| Presentation Techniques | Community Affairs Seminars |
- and any others

GA-4- BUSINESS EDUCATION

Courses in Business Education are planned especially for adults who desire business education for personal purposes. Among the courses provided by the College are the following:

Personal Typing	Estate Planning
Business English	Law for Layman
A B C Stenoscrypt	Investments (Stocks, Bonds,
Bookkeeping	and Mutual Funds)
Business Correspondence	and others

GA-5- CITIZENSHIP DEVELOPMENT

The development of creative citizenship responsive to community potential and problems is an imperative of these times. Courses in citizenship education contribute to such development. Among the citizenship development courses offered by Coastal Carolina Community College are the following:

American History	State Government
World History	Americanization
North Carolina History	English for New Americans
United Nations	and others

GA-6- HOMEMAKING EDUCATION

Homemaking Education is designed to help family members take advantage of emerging opportunities in education. Adult education courses in homemaking suggest scores of ways to help make family life more exciting, more enjoyable, and more economical. Among the courses offered by the College are the following:

Creative Crafts	Flower Growing
Knitting	Flower Arranging
Home Sewing	Interior Decorating
Ornamental Horticulture	and many others

GA-7- CONSUMER EDUCATION

Consumer Education contributes to efficient consumption of America's vast storehouse of economic goods. Among the courses available are the following:

Basic Economics	Personal Income Tax
Buying a Home	Law for Layman
Budgeting	Investments (Stocks,
Home Record Keeping	Bonds, and Mutual
Tips on Household	Funds)
Repairs (for women)	and others

GA-8- HEALTH AND SAFETY EDUCATION

Health Education and Safety courses are especially designed for the improvement of health and the safety of people. Courses are available as follows:

Boating Education and Safety	Hunter Safety Training
Basic Seamanship and Navigation	First Aid
Small Boat Handling	Home Fire Safety and Others

GA-9- LANGUAGE ARTS EDUCATION

Language Arts Education provides adults with courses to widen horizons and create new dimensions in thinking and acting. Some of the courses offered in the area are the following:

Conversational Spanish	Public Speaking
Conversational French	Literature
Speed Reading	Parliamentary Procedure
Creative Writing	Improved Listening
and others	

GA-10-CREATIVE ARTS EDUCATION

Creative Arts Education is designed to help adults discover and develop latent talents, refine active talents, and develop interest in and appreciation of the fine arts heritage of our society. Courses which are offered in Creative Arts Education by the College include the following:

Oil Painting	History of Art
Water Color Painting	Music Appreciation
Drawing	Choral Music
Landscape Painting	and others

GA-11-FAMILY LIFE PROGRAMS

The Family Life Program includes Parent Education and Senior Citizen Education.

GA-12-PARENT EDUCATION

Parent Education is designed to contribute new ideas and approaches to rearing children providing solutions to parent-youth problems. This program is designed to make family life more satisfactory in the midst of a changing world. Courses include the following:

The Pre-School Child	Baby Care
The Child 6 to 12 years	Marriage and Family Life
Understanding Teenagers	and others

GA-13-SENIOR CITIZENS EDUCATION

American citizens are living longer and are more active in their senior years. Time is available to participate in a variety of learning experiences which earlier years may not have permitted. Among the learning experiences provided especially for senior citizens are the following:

Health for Senior Citizens	Retirement Planning
Home Gardening	Challenge of Maturity
Arts and Crafts	Travel Tour Lectures
Great Thinkers	Human Relations
and others	

B. OCCUPATIONAL EXTENSION

Occupational education extension courses are designed to serve adults who are employed or are seeking employment at the skilled, technical and sub-professional levels. Persons in professional occupations may also profit from such instruction by learning of new developments in their field.

Any adult eighteen (18) years or older who needs training or re-training or who can otherwise profit from the proposed instruction may be enrolled. Enrollees who are employed normally attend training during their non-working hours to increase their skills and understanding, to improve their competency and qualify for advancement.

OE-1-BUSINESS EDUCATION

Courses in office occupations are planned for adults who desire business education for up-grading or job-related purposes. Among the courses provided are as follows:

Typing	Business Correspondence
Business English	Business Math
Gregg Shorthand	Business Machines
Bookkeeping	and others

OE-2-DISTRIBUTIVE TRAINING

There is a growing need for better trained retail personnel in the College's Service Area. Th College offers opportunity for training in distributive education. Classes are available in the following subject areas:

Creative Salesmanship	Advertising
Marketing Research	Credit and Collections
Commercial Art	Customer Relations

OE-3-NEW INDUSTRY TRAINING

Coastal Carolina Community College, in cooperation with the industrial Services Division of the North Carolina Department of Community Colleges, provides instruction for new and expanding industries.

This training incorporates job analysis, instructor recruiting and-or training, financial support for job instruction and an adaptation for continuous training. Such training aids in more efficient plant production for industry and greater opportunity for advancement of the employee. New industry planning to locate in the area or industries who are planning on expansion and are interested in this training should contact Coastal Carolina Community College or Department of Community Colleges, Raleigh, North Carolina.

OE-4-SUPERVISORY DEVELOPMENT TRAINING

Supervisory Development Training courses are designed for potential and active supervisors who want to prepare for more effective leadership areas including the following:

- | | |
|---------------------------|--------------------------|
| Principles of Supervision | Job Methods |
| Human Relations | Industrial First Aid |
| Effective Communications | Safety and |
| Effective Speaking | Accident Prevention |
| Effective Writing | Cost Accounting |
| Reading Improvement | Conference Leadership |
| Economics in Business | Instructor Training |
| and Industry | Job Analysis Training |
| The Supervisor Work | Creative Thinking |
| Measurement | Supervision in Hospitals |
| and others | |

OE-5-LAW ENFORCEMENT TRAINING

Law Enforcement Training may be requested by local towns and local law enforcement agencies. It is especially designed as inservice education for those now engaged in law enforcement activities. Among courses provided by the College are the following:

- | | |
|------------------------|--------------------|
| Courts and Laws | Applied Psychology |
| Elements of Offense | Human Relations |
| Motor Vehicle Law | Chemical Test |
| Criminal Investigation | Riot Control |
| Juveniles | and others |

E-6-FIRE SERVICE TRAINING

Fire Service Training is designed to provide firemen the opportunity to gain technical information and skill in modern fire fight-

ing through a variety of learning experiences and practical problems. The classes are often taken to the fireman through training sessions held in local departments. Among the courses offered are the following.

Introduction to Firefighting	Rope Practices
Portable Fire	Ladder Practices
Extinguishers	Hose Practices
Fire Stream Practices	Rescue Practices
Fire Apparatus Practices	Forcible Entry
Fire-fighting Procedures	and others

OE-7-FISHERIES TRAINING

Net Mending	Crab Picking
Marine Engine	and Others
Outboard Engine	

C. LEARNING CENTER

The Learning Center is an important adjunct to the total college instructional program. This program is designed to provide study opportunities in practically any field in which an adult or college student might be interested. In the Center are numerous programmed instruction courses in English, reading, mathematics, science, business, social studies, and foreign languages.

Programs are designed to meet the needs of individuals at all levels from non-readers to the college graduate. Students may study for an Adult High School Diploma or prepare for the General Education Development Tests, or take selected individualized courses through independent study for college transfer credit.

The Center is essentially an individualized study situation in which programmed and other self-instructional materials are used. Programmed instruction courses are designed so as to aid the student in learning information in small sequences called "frames." Each frame requires an immediate response, and each response is checked immediately. If the student makes the incorrect response, the program makes the correction or re-teaches.

The Center is open during the day, Monday through Friday and Monday through Thursday evenings so students may study several hours a day or night. It is located on-campus and located in Bldg. No. 11, Camp Lejeune.

There are no fees charged for a study in the Learning Center, and a coordinator is available at all times to assist students with any programs.

For information about either the campus laboratory or the laboratory at Camp Lejeune, call the laboratory coordinator at either the college or the base.

D. COMMUNITY SERVICES

Coastal Carolina Community College sponsors and promotes a number of community services. These services contribute to the cultural, economic and civic development of the community. Also, the college may be host to a number of local, state and national groups that will conduct seminars and conferences on campus. The centrally located campus with its conference rooms and other facilities is ideally suited for conferences and seminars. Lodging and restaurants and other facilities are located nearby for the out-of-town conferee. Among the more frequently offered community services are the following:

Seminars and Conferences	Community Studies
Speakers Bureau	Consultant Services
Art Exhibits	Discussion Groups
Fine Arts Series	Musical Programs

and many others

NORTH CAROLINA APPROVED DRIVING SCHOOL

Coastal Carolina Community College offers a complete Driving School to all individuals in the Onslow County service area. The school takes the non-drivers through 33 hours of comprehensive classroom work and 18 hours in-the-car driving.

For further information about the Driving School call, Dean of Continuing Education.

TO SUMMARIZE EXTENSION, GENERAL ADULT, OR COMMUNITY SERVICE PROGRAMS:

Any other course or program can be offered by the Coastal Carolina Community College anywhere in Onslow County depending on several factors:

1. Ten people or more to constitute a need for a class.
2. A suitable classroom situation to house the program.
3. A qualified instructor can be employed.
4. That the program in question has well identified aims, realistic goals, and effective methods in accomplishing the class purpose.

To inquire about the possibility of holding any class or program in your particular area, please call the Dean of Continuing Education, Coastal Carolina Community College, telephone 455-1221, or come by and see him.

DESCRIPTION OF COURSES

COURSE NUMBERING

Courses at Coastal Carolina Community College are numbered in accordance with the system of the North Carolina Department of Community Colleges.

1. All preparatory or developmental courses are indicated by a three-letter prefix and numbered from 60-99. These courses are not transferable.

Example: MAT 91

2. All freshman transfer courses are indicated by a three-letter prefix and are numbered 100-199.

Example: MAT 101

3. All sophomore transfer courses are indicated by a three-letter prefix and are numbered 200-299.

Example: MAT 201

4. All freshman technical courses are indicated by a "T" and a three-letter prefix and are numbered 100-199.

Example: T-BUS 183

5. All sophomore technical courses are indicated by a "T" and a three-letter prefix and are numbered 200-299.

Example: T-BUS 205

6. All vocational courses are indicated by a prefix and are numbered 1100-1299.

Example: MAT 1101

7. All adult education courses beyond the high school level are indicated by a prefix and are numbered 2000-2999.

8. All high school courses are numbered according to the North Carolina Public School numbering system.

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

ARCHITECTURAL TECHNOLOGY

T-ARC 101—Architectural Graphics I	2	6	4
------------------------------------	---	---	---

A course designed to provide a fundamental knowledge of the principles of architectural drafting. The basic skills and techniques of drafting expression, sketching, architectural lettering, and use of instruments and equipment are stressed. Geometrical construction, orthographic drawing, and projection problems are studied. The principles of isometric, oblique and perspective drawings are introduced. Graphic symbols common to the various construction trades are stressed to enable one to interpret construction drawings and prints. Various methods of reproduction will be introduced.
Prerequisite: None

T-ARC 102—Architectural Graphics II	2	6	4
-------------------------------------	---	---	---

A continuation of the fundamental knowledge of the principles of architectural drafting. Projection problems dealing with descriptive geometry in architecture are studied. Drafting expression with the basic control of line quality and technique is stressed. Emphasis is placed on the student to express and produce numerous construction details using appropriate symbols and conventions on a professional level. The study of sketching and architectural lettering is continued.
Prerequisite: T-ARC 101

T-ARC 103—Architectural Graphics III	0	9	3
--------------------------------------	---	---	---

An approach in depth to the study of architectural drafting. Development of techniques in architectural lettering, dimensioning, freehand sketching and instrument drawing. Drawing of construction of details, using appropriate material symbols and conventions. Working drawings, including plans, elevations, sections, scale details and full-size details will be prepared from preliminary sketches.
Prerequisites: T-ARC 102, T-ARC 116, T-ARC 121

T-ARC 116—Environmental Science I	3	3	4
-----------------------------------	---	---	---

A general study of heating and air conditioning theory, codes, equipment, materials and the graphic symbols used. Consideration for the thermal characteristics of building materials relative to the environmental control of architectural space will be emphasized. Coordination of the physical limitations of heating and air conditioning equipment and apparatus with the structural and architectural elements will be stressed. Reading and interpretation of mechanical working drawings will be required by the student to familiarize him with various graphic techniques.
Prerequisites: T-ARC 102 and T-ARC 122

T-ARC 121—Architectural Materials & Methods I	3	3	4
---	---	---	---

General broad base study of basic materials and methods used in the construction of architectural structures will be studied. Field trips to construction sites and study of light construction techniques are included.
Prerequisite: None

T-ARC 122—Architectural Materials & Methods II	3	3	4
--	---	---	---

Materials used in the construction of architectural structures will be studied. Field trips to construction sites and the study of commercial and industrial construction methods and techniques are included.
Prerequisite: T-ARC 121

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-ARC 201—Architectural Graphics IV	2	9	5
Drawing of structural plans and details as prepared for building construction including steel, concrete, and timber structural components. Appropriate details and drawings necessary for construction and fabrication of structural members. Reference materials will be used to provide the draftsman with skills and knowledge in locating data and in using handbooks.			
Prerequisite: T-ARC 103			
T-ARC 202—Architectural Graphics V	2	9	5
The application of knowledge gained in studying the mechanical plumbing and electrical requirements in architecture. The students will prepare working drawings, giving consideration to the coordination of the architectural and structural components, for mechanical, plumbing and electrical requirements for a small structure. Descriptive techniques relative to the graphic presentation of these types of environmental control elements will be stressed.			
Prerequisite: T-ARC 201			
T-ARC 203—Architectural Graphics VI	2	9	5
Group projects, resulting in complete working drawings, will be undertaken by the students to obtain experience in working and coordinating their efforts with associates. Accomplishing a group solution to a given architectural assignments. Site and landscape studies will be included in the above and will be executed to conform with current professional practices. Consideration for the coordination of the various elements utilized in the complete working drawings will be stressed to insure a comprehensive understanding of these architectural processes.			
Prerequisites: T-ARC 202, T-CIV 101			
T-ARC 211—Architectural Surveying	2	6	4
Basic instruments use; construction site surveying; and building layout will be studied. Drafting room application of surveyors' field notes for preparation of site plans and cost estimating.			
Prerequisite: T-MAT 102			
T-ARC 230—Construction Estimating and Field Inspecting	3	3	4
Interpretation of working drawings for a project; preparation of material and labor quantity surveys from plans and specifications; approximate detailed estimates of cost. The student will study materials take-off, labor take-off, sub-contractors' estimates, overhead costs, and bid contract procedures. Detailed inspection of the construction by comparing the finished work with the specifications.			
Prerequisite: T-ARC 235			
T-ARC 233—Office Practice Seminar	2	0	2
A study of the professional relationship of the architectural firm in relation of clients, contractors, suppliers, consultants and other architects. Ethics of the profession as applicable to the draftsman's role in the architectural firm will be stressed.			
Prerequisite: None			
T-ARC 235—Codes, Specifications and Contract Documents	3	0	3
A study of building codes and their effect in relation of specifications and drawings. The purpose and writing of specifications will be studied along with their legal and practical application to working drawings. Contract documents will be analyzed and studied for the purpose of client-architect-contractor responsibilities, duties and mutual protection.			
Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

AIR CONDITIONING & REFRIGERATION

AHR 1101—Automotive Air Conditioning	2	3	3
General introduction to the principles of refrigeration; study of the assembly of the components and connections necessary in the mechanisms, the methods of operation, and control; proper handling of refrigerants in charging the system. Use of testing equipment in diagnosing trouble conducting efficiency tests and general maintenance work. Prerequisite: None			

AHR 1121—Fundamentals of Refrigeration I	5	6	7
Terminology used in the trade, principles of refrigeration; identification of basic system components; introduction to and practice with tools and shop equipment found in the field today. Standard procedures and safety measures are included. Prerequisite: None			

AHR 1122—Fundamentals of Refrigeration II	4	6	6
A follow-up course in basic refrigeration utilizing theory, procedures, tools and equipment studied in first quarter's work. Strong emphasis is placed upon domestic refrigerators, freezers and window air conditioning units. Machines with electrical and mechanical difficulties are brought in and repaired by the student. Refrigerant characteristics are studied. Manufacturers' service manuals are used in conjunction with text. Prerequisite: AHR 1121			

AHR 1123—Commercial Refrigeration	3	12	7
Installation of common types of commercial refrigeration; problems and solutions prevalent in the commercial field, medium and low temperature units with electric, hot gas, reverse cycle and water defrost; use of manufacturers catalogs in sizing and matching system components; system sketching and pipe symbols. Prerequisites: AHR 1122, PHY 1105			

AHR 1124—Winter Air Conditioning I	4	6	6
Introduction to heating systems; furnaces, boilers, steam and hot water piping; humidifiers, air movement and noise; heat loss and new terminology. Hot air and hot water systems will be installed, operated, checked and adjusted. Prerequisite: AHR 1123			

HR 1125—Principles of Air Conditioning	5	0	5
Review of refrigerant cycle and characteristics of mechanical cooling equipment. Sensible and latent heat loads; air mixtures and dehumidification; system capacity and air distribution; pipe schematics and component symbols. Prerequisite: AHR 1123			

HR 1126—Sheet Metal Layout & Fabrication I	2	4	4
Work in drafting room with instruments developing patterns on paper for popular duct fittings. Proper layout procedures are followed in work on plates including square and radius elbows, offsets, transitions, "Y" branches, and square to round fittings. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
AHR 1127—Winter Air Conditioning II	4	6	6
Stress is placed upon the burner mechanism of the boiler furnace. Piping and wiring; burner components and system controls both electrical and mechanical; operational problems involving diagnosis, procedure and service technique; oil and gas burner capacity and efficiency test; code and safety.			
Prerequisite: AHR 1124			
AHR 1128—Control Systems	2	3	3
Review of basic electricity and simple circuitry for controls. System components for special applications. Electronic and pneumatic operations. Motor controllers and starters. Thermostats, solenoid pressure switches, oil failure controls. Motorized dampers and valves. Installation and service practice.			
Prerequisite: None			
AHR 1129—Air Conditioning Shop Practice I	3	6	5
A continuation of practice on all shop procedures encountered by the student to this point; work on air conditioning compressors, central installations and troubleshooting; sheet metal duct fabrication and installation; also duct insulation materials and procedures.			
Prerequisites: AHR 1123, AHR 1126			
AHR 1131—Absorption Systems	3	3	4
Basic absorption cycle, strong solution circuit, refrigeration circuit, system components, system controls, direct and indirect fired; advantages, disadvantages and applications.			
Prerequisite: AHR 1125			
AHR 1133—Air Conditioning Shop Practice II	3	6	5
Emphasis on pipe work and water circuits with boilers and chillers; emphasis on control work with heat pumps, chillers and direct expansion air conditioning systems; fabrication and installation of motorized dampers automatically operated; strengthen all manipulative skills through practice.			
Prerequisite: AHR 1129			
AHR 1134—Sheet Metal Layout & Fabrication II	0	6	2
All popular types of sheet metal duct—fittings are laid out, cut, formed, and fabricated. Shop procedures are learned and all sheet metal equipment is utilized. The trainee becomes proficient in the use of many hand tools and operations such as seaming, riveting, soldering, shearing, crimping and measuring are mastered.			
Prerequisite: AHR 1126			
AHR 1135—Electric & Hydronic Systems	3	6	5
To give a practical and working knowledge (at a helpers level) of electric, steam, hot and chilled water systems. Theory of operations, proper installation and servicing procedures, controls and piping.			
Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
AUTO BODY REPAIR AND AUTOMOTIVE MECHANICS			
AUT 1111—Auto Body Repair I	3	15	8
Basic principles of automobile construction, design and manufacturing. A thorough study of the requirements of a metal worker including the use of essential tools, formation of sheet metal into angles and crowns and straightening simple damage. The student applies the basic principles of straightening, shrinking filling, aligning and painting of damaged parts. Prerequisite: None			
AUT 1112—Auto Body Repair II	5	18	11
Development of skills to shrink stretched metal filling and preparation of the metal for painting. Straightening of doors, hoods and deck lids; fitting and aligning of panels. Removal and replacement of outer panels, checking and straightening of damaged frames. Writing of estimates, pricing and ordering of parts and developing the final settlement with customer. Practice of spot repairs and complete repainting of vehicle. Prerequisites: AUT 1111, WLD 1101, MAT 1101, ENG 1101			
AUT 1113—Metal Finishing and Painting	3	12	7
A continuation of all phases of instruction covered in AUT 1111 and AUT 1112, making the instruction as realistic as possible by making repairs and refinishing cars with actual collision damage. Special emphasis will be placed on paint products, technique of use, color matching and paint problems. Also included in this quarter is AUT 1115, a course in automotive glass and trim. Prerequisites: AUT 1112, WLD 1105			
AUT 1114—Body Shop Applications	3	15	8
General introduction and instruction in the automotive chassis and suspension systems, the methods of operation and control and the safety of the vehicle. Unit job application covers straightening of frames and front end alignment. The student applies all phases of training such as writing estimates, parts ordering, repairs and refinishing of projects. Prerequisites: AUT 1113, AUT 1115, BUS 1103			
AUT 1115—Trim, Glass and Upholstery	1	6	3
Familiarization of various methods of attaching and removing trim, glass and hardware. Instruction in proper installation and adjustment of door glasses, aligning and sealing windshields and rear glasses, stressing safety precautions. Instruction in materials and methods used for cleaning interior trim and upholstery. This course is taught in conjunction with AUT 1113. Prerequisite: AUT 1112			
AUT 1123—Brakes, Chassis and Suspension Systems	3	12	7
A complete study of various braking systems employed on automobiles and light weight trucks. Emphasis is placed on how they operate, proper adjustment and repair. Also, the servicing of parking brakes is emphasized. Principles and functions of the components of automotive chassis. Practical job instruction in adjusting and repairing of suspension systems. Prerequisite: None			
AUT 1124—Automotive Power Train Systems	3	12	7
Principles and functions of automotive power train systems: clutches, transmission gears, drive shaft assemblies, rear axles and differentials. Identification of troubles, servicing, and repair. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
AUT 1125—Auto Servicing I	3	9	6
Emphasis is on the shop procedures necessary in "troubleshooting" the various component systems of the automobile. "Troubleshooting" of automotive systems, provides a full range of experiences in testing, adjusting, repairing and replacing components. A close simulation to an actual automotive shop situation will be maintained.			
Prerequisites: PME 1102, AUT 1123			
PME 1101—Internal Combustion Engines	3	15	8
Development of a thorough knowledge and ability in using, maintaining, and storing the various hand tools and measuring devices needed in engine repair work. Study of the construction and operation of components of internal combustion engines. Testing of engine performance; servicing and maintenance of pistons, valves, cams and camshafts, fuel and exhaust systems, cooling systems; proper lubrication; and methods of testing, diagnosing and repairing.			
Prerequisite: None			
PME 1102—Engine Electrical and Fuel Systems	5	12	9
A thorough study of the electrical and fuel systems of the automobile. Battery cranking mechanism, generator, ignition, accessories and wiring; fuel pumps, carburetors, and fuel injectors. Characteristics of fuels, types of fuel systems, special tools, and testing equipment for the fuel and electrical systems.			
Prerequisite: None			
PME 1122—Chassis & Suspension Systems	3	9	6
Principles and functions of the components of automotive chassis. Practical job instruction in adjusting and repairing of suspension systems.			
Prerequisite: None			
PME 1202—Auto Electrical/Electronics	3	6	5
A thorough study of the theory and operation of various automobile electrical units and systems. Maintenance and testing procedures, diagnosis and repair of all types of electrical/electronic components, especially the transistor circuits, found on the modern automobile.			
Prerequisite: PME 1102			
PME 1203—Automotive Engine Tune-Up	4	9	7
This course is designed to provide depth in the understanding and use of various types of tune-up equipment. Emphasis is placed on gaining knowledge of the waveforms of the oscilloscope and other units on the Tune-Up Tester. Through proper use of tune-up equipment, the student is expected to demonstrate his ability to diagnose malfunctions in ignition systems, cranking motors and charging circuits.			
Prerequisite: PME 1102			
PME 1221—Front Suspension, Alignment and Power Steering	1	6	3
Theory of operation, correct disassembly and mounting of all front suspension parts on various types of frames (car and light truck). A thorough understanding of the function and repair of steering gears (power and standard), shock absorbers, springs, wheels and tires, pumps, rams, etc. is gained. Theory and application of steering geometry, correct diagnosis of problems and use of the alignment and balancing machines; analysis and correction of tire wearing problems, vibrations, hard steering, pulling, etc. is experienced.			
Prerequisite: AUT 1123			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PME 1224—Advanced Automatic Transmissions	3	12	7

This course is designed to provide a measure of depth in the understanding of automatic transmissions. Instruction includes classroom study, demonstrations, and student participation in disassembly, reassembly, and testing of selected transmissions. Special emphasis is placed on principles function, construction, operation, servicing and “troubleshooting” procedures and repair of various types of automatic transmissions.

Prerequisite: AUT 1124

PME 1226—Automobile Servicing II	2	6	4
----------------------------------	---	---	---

Emphasis is placed on “troubleshooting” and repairing the various component systems on vehicles provided for general repairs. The student is given in depth experiences in diagnosis, testing, adjusting, repairing, and replacing component parts.

Prerequisite: AUT 1125

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
BUSINESS			
BUS 91—Business Machines	3	2	4
A general survey of the business and office machines. Students will receive an introduction to and training in techniques, processes, operation and application of the ten-key adding machines and calculators. If a grade of B is achieved credit may be granted for T-BUS 110, with recommendation of the instructor.			
BUS 94—Bookkeeping I	3	2	4
A study of the basic bookkeeping cycle. Begins with the starting of a bookkeeping system, covers the basic elements, the bookkeeping equation, the journalizing of transactions, the ledger, worksheet, financial statements and the closing of the ledger.			
BUS 95—General Business	3	2	4
A study to help students become more competent in making economic choices and using business services; to develop desirable economic attitudes: willingness to assure responsibilities; awareness of personal obligations to others and appreciation of the role of the individual in business and government; to sharpen basic business skills, to develop an understanding of business occupations and to provide a basis for further study in business.			
BUS 97—Economics I	5	0	5
A study of the basic concepts, principles, terminology and philosophy of economics from both a social and political view point.			
BUS 98—Bookkeeping II	3	2	4
A study of the bookkeeping cycle with special journals and subsidiary ledgers.			
BUS 99—Economics II	5	0	5
A continuation of BUS 97 with emphasis on current issues.			
BUS 101—Introduction to Business	5	0	5
A survey of the types of business organizations with emphasis on financing, marketing, business law, and internal control and management. Prerequisite: None			
BUS 102—Beginning Typewriting	2	3	3
Introduction to the touch typewriting system with emphasis on correct techniques, mastery of the keyboard, copy placement, memos, postal cards, business letters, tabulation, and simple reports. The student will type at least 30 gross words a minute on straight copy material for five minutes with a maximum of five errors. Prerequisite: None			
BUS 103—Intermediate Typewriting	2	3	3
Instruction emphasizes the development of speed and accuracy with further mastery of correct typewriting techniques. These skills and techniques are applied in styles of business letters, including letters on odd-size stationery and two-page letters; open, ruled and boxed tabulations; telegrams; interoffice memorandums; and other business forms. Upon completion of this course, the student will type at least 40 words a minute on straight copy material for five minutes with a maximum of five errors. Prerequisite: BUS 102			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
BUS 104—Advanced Typewriting	2	3	3
Emphasis on typing tables with special problems, prepare material for duplication, and type material relevant to a variety of office situations. Upon completion of this course the student will type at least 50 words a minute on straight copy material for five minutes with a maximum of five errors. Prerequisite: BUS 103			
BUS 106—Beginning Shorthand	3	2	4
A beginning course in the theory and practice of reading and writing shorthand. Emphasis on phonetics, penmanship, word families, brief forms, and phrases. Prerequisite: None			
BUS 107—Intermediate Shorthand	3	2	4
Continued study of theory with greater emphasis on dictation and transcription. Upon completion of the course, the student should be able to take new matter dictation for three minutes at a minimum of 60 words a minute with 97 percent accuracy. Prerequisite: BUS 106			
BUS 108—Advanced Shorthand	3	2	4
Theory and speed building. Emphasis on transcription at the typewriter and correct copy. Upon completion of the course, the student should be able to take dictation of new material for three minutes at a minimum of 70 words a minute with 97 percent accuracy. Prerequisite: BUS 107			
T-BUS 110—Office Machines	2	2	3
A general survey of the business and office machines. Students will receive training in techniques, processes, operation and application of the ten-key adding machines, full keyboard adding machines, rotary calculators, printing calculators, and electronic calculators. Prerequisite: None			
T-BUS 112—Filing	3	0	3
Provides training in the field of records storage and control. Covers fundamental rules of alphabetic indexing and fundamental principles of filing as applied to both cards and correspondence. Appropriate coverage is given to four basic correspondence filing systems—alphabetic, numeric, subject, and geographic. Materials consist of textbook and practice set for card filing and correspondence filing. Prerequisite: None			
T-BUS 115—Business Law	5	0	5
A general course designed to acquaint the student with certain fundamentals and principles of business law, including contracts, negotiable instruments, and agencies. Prerequisite: None			
T-BUS 116—Business Law	5	0	5
Includes the study of laws pertaining to bailments, sales, risk-bearing, partnership-corporation, mortgages, and property rights. Prerequisite: T-BUS 115			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
BUS 120—Principles of Accounting	5	2	6
A study of the basic accounting concepts, with emphasis on the accounting cycle for single proprietorship. Preparation of journals, ledgers, work sheets, balance sheets, and income statements. Introduction to basic concepts of internal control. Prerequisite: MAT 110 or 111, or equivalent.			
T-BUS 118—Record Keeping	5	2	6
Principles, techniques and tools of accounting, for understanding of the mechanics of accounting. Collecting, summarizing, analyzing, and reporting information about service and mercantile enterprises, to include application of the principles learned. Prerequisite: None			
BUS 121—Principles of Accounting	5	2	6
A study of accounting principles as applied to partnership and corporation. An introduction to basic concepts of cost accounting and interpretation of financial statements. Prerequisite: BUS 120			
T-BUS 123—Business Finance	5	0	5
Financing of business units, as individuals, partnerships, corporations, and trusts. A study is made of short-term, long-term, and consumer financing. Financing, federal, state, and local government and the ensuing effects upon the economy. Factors affecting supply of funds, monetary and credit policies. Prerequisite: None			
T-BUS 134—Personal Development	3	2	4
Designed to help the student recognize the importance of physical, intellectual, social, and emotional dimensions of personality. Emphasis is placed on poise, grooming and methods of personal improvement. Prerequisite: None			
T-BUS 183L—Terminology and Vocabulary	3	0	3
To develop an understanding of the terminology and vocabulary appropriate to the course of study, as it is used in business, technical, and professional offices. Prerequisite: BUS 107			
T-BUS 183M—Terminology and Vocabulary	3	0	3
To develop an understanding of the terminology and vocabulary appropriate to the course of study, as it is used in business, technical, and professional offices. Prerequisite: BUS 107			
T-BUS 205—Technical Typewriting	2	3	3
Emphasis is placed on the development of individual production rates. The student learns the techniques needed in planning and in typing projects that closely approximate the work appropriate to the field of study. These projects include review of letter forms, statistical tabulation, and the typing of reports, manuscripts and legal documents. Prerequisite: BUS 104			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-BUS 206—Dictation and Transcription	3	2	4
Develops the skill of taking dictation and of transcribing at the typewriter materials appropriate to the course of study, which includes a review of the theory and the dictation of familiar and unfamiliar material at varying rates of speed. Minimum dictation rate of 80 words per minute required for five minutes on new material with 98 percent accuracy. Prerequisite: T-BUS 108			
T-BUS 207—Dictation and Transcription	3	2	4
Covering materials appropriate to the course of study, the student develops the accuracy, speed, and vocabulary that will enable her to meet the stenographic requirements of business and professional offices. Minimum dictation rate of 90 words per minute required for five minutes on new material with 98 percent accuracy. Prerequisite: T-Bus 206			
T-BUS 208—Dictation and Transcription	3	2	4
Principally a speed building course, covering materials appropriate to the course of study, with emphasis on speed as well as accuracy. Minimum dictation rate of 100 words per minute required for five minutes on new material with 98 percent accuracy. Prerequisite: T-BUS 207			
T-BUS 211—Office Machines	2	2	3
Instructions in the operation of the bookkeeping-accounting machines, and duplicating equipment. Prerequisite: BUS 104			
T-BUS 212—Transcribing Machines	3	0	3
Students will receive training in the operation of dictating and transcribing machines. Prerequisite: BUS 104			
T-BUS 214—Secretarial Procedures	3	2	4
Designed to acquaint the student with the responsibilities encountered by a secretary during the work day. These include the following: receptionist duties, handling the mail, telephone techniques, travel information, telegrams, office records, purchasing of supplies, office organization, and insurance claims. Prerequisites: T-BUS 205, T-BUS 206			
T-BUS 219—Credit Procedures and Problems	3	0	3
Principles and practices in the extension of credit; collection procedures; laws pertaining to credit extension and collection are included. Prerequisite: None			
T-BUS 222—Intermediate Accounting	5	0	5
A thorough review of fundamental accounting processes of accounting. Emphasis on concepts and principles underlying the accounting process. In depth study of financial statement relations. Prerequisite: BUS 121			
T-BUS 223—Intermediate Accounting	5	0	5
A continuation of study began in T-BUS 222. Statement analysis, fund flows, special statements and business liquidation will be covered. Prerequisite: T-BUS 222			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
BUS 226—Cost Accounting	5	2	6
The course is designed to introduce the students to the basic concepts applied to computer applications. Departmental accounting and job order costs are surveyed to give the students a working vocabulary of specialized terminology. Prerequisite: BUS 121			
T-BUS 227—Advanced Accounting	5	0	5
Special accounting problems of installment and consignment sales, partnerships, home and branch office accounting, consolidations and price-level changes. Prerequisite: T-BUS 223			
T-BUS 229—Taxes	3	2	4
Application of federal and state taxes to individuals, proprietorships, and partnership. A study of the basic taxes are made. Prerequisite: None			
T-BUS 230—Corporate Taxes	5	0	5
Federal tax law as applied to corporate structures. Prerequisite: T-BUS 222			
T-BUS 232—Sales Development	3	0	3
The student will identify and define buying motives and the techniques of making a sale. He will also identify the characteristics associated with successful salesmen. Prerequisite: None			
T-BUS 235—Business Management	5	0	5
Principles of business management including overview of major functions of management, such as planning, staffing, controlling, directing, and financing. Clarification of the decision-making function versus the operating function. Role of management in business-qualifications and requirements. Prerequisite: None			
T-BUS 239—Marketing	5	0	5
A general survey of the field of marketing, with a detailed study of the functions, policies, and institutions involved in the marketing process. Prerequisite: None			
T-BUS 243—Advertising	3	2	4
The role of advertising in a free economy and its place in the media of mass communications. A study of advertising appeals; product and market research; selection of media; means of testing effectiveness of advertising. Theory and practice of writing advertising copy for various media. Prerequisite: None			
T-BUS 245—Retailing	3	0	3
A study of the role of retailing in the economy including development of present retail structure, functions performed, principles governing effective operation and managerial problems resulting from current economic and social trends. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-BUS 269—Auditing	5	0	5
An introduction to auditing theory and practice covering audits as conducted by independent public accountants. Included are auditing standards, procedures, and professional ethics. Prerequisite: T-BUS 223			
T-BUS 272—Principles of Supervision	3	0	3
Introduces the basic responsibilities and duties of the supervisor and his relationship to superiors, subordinates, and associates. Emphasis on securing an effective work force and the role of the supervisor. Methods of supervision are stressed. Prerequisite: None			
T-BUS 284M—Terminology and Vocabulary	3	0	3
Greater emphasis on an understanding of the terminology and vocabulary appropriate to the course of study, as it is used in business, technical, and professional offices. Prerequisite: T-BUS 183M			
BUS 1103—Small Business Operations	3	0	3
An introduction to the business law, business forms and records, financial problems, ordering and inventorying, layouts of equipment and offices, methods of improving business, and employer-employee relations. Prerequisite: None			
BUS 1105—Industrial Organizations	3	0	3
Methods, techniques, and practices of modern management in planning, organizing and controlling operations of a manufacturing concern. Introduction to the competitive system and the factors constituting product cost. Prerequisite: None			
ECO 201—Principles of Economics	3	0	3
Survey of basic economic aspects of the national economy. Emphasis on income determination, pricing mechanisms, labor, and function of money and banking. Prerequisite: None			
ECO 202—Principles of Economics	3	0	3
A continuation of Economics 201 with emphasis on pricing, international trade and finance, and economic problems. Prerequisite: ECO 201			
ECO 203—Principles of Economics	3	0	3
A continuation of Economics 202 with emphasis on the economic problems of agriculture, labor, and welfare, with an introduction to decision theory. Prerequisite: ECO 202			
DP 104—Introduction to Data Processing Systems	5	2	6
Punched card concepts; unit-record machines' principles and procedures; introduction to electronic digital computers with their connected input-output devices; binary and hexadecimal number concepts; and an introduction to flow-charting; and an introduction to simple programming in one programming language. Prerequisite to all other programmings with the exception of those students with computer programming (or other relevant) experience and permission of the instructor.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
EDP 105—Assembly Language I	3	4	5

Computer data formats utilizing DC's and DS's; Base-displacement addressing of core storage; the 5 basic instruction formats; integer binary arithmetic; binary arithmetic with rounding; data movement instruction; data translation instructions; branch instructions; input-output instructions (macros); writing of print programs utilizing the card reader and the printer.

Prerequisites are either EDP 104 or previous programming experience and the instructor's permission.

EDP 107—Fortran	2	4	4
-----------------	---	---	---

Analysis of equations and translation to Fortran statements; simple **REAL** and **INTEGER** formats; unconditional branches to statement numbers; logical "IF"—statements; explanation of "free" Input-Output statements available only in **WATFIV**; explicit and implicit declarations; **DO**-loops; arrays and subscripting; advanced input-output utilizing the "**FORMAT**"—statement. This course utilizes the **WATFIV** compiler.

Prerequisites are EDP 104 and T-MAT 106 Electronic Data Processing—Mathematics I. Practical programming experience may be accepted by the instructor in lieu of EDP 104.

EDP 201—Assembly Language II	3	4	5
------------------------------	---	---	---

Packed-decimal arithmetic; use of **ED** and **EDMK** instructions to make output numeric data more readable; loop programming (utilizing **BCT**, **BCTR**, **BXH**, and **BXLE**); indexing; logical operations (**AND**, **OR**, and **EXCLUSIVE-OR** instructions); programming appropriate problems with extensive use of core dumps.

Prerequisite is either EDP 105 or appropriate programming experience with IBM's Assembly Language and permission of the instructor.

EDP 202—Cobol I	2	4	4
-----------------	---	---	---

This course teaches the basic elements necessary to code programs using sequential data sets (only). The Data Division is treated rigorously. By the end of the course the students write a print-problem involving several control breaks.

Prerequisite is EDP 104 or previous programming experience and the instructor's permission.

T-EDP 204—Introduction to Data

Processing—Business	3	2	4
---------------------	---	---	---

An overview of the field of electronic data processing. Major topics include historical development, unit record, number systems, basic input-output operations, flow-charting, and an introduction to computer programming. Prerequisite: None

EDP 210—Cobol II	2	4	4
------------------	---	---	---

Table handling;
Reading of sequential and indexed-sequential data sets (on IBM disk pack);
File maintenance problem; and
SORT-verb.

NOTE: This course emphasizes program writing and debugging by the students.

Prerequisite is EDP 202 (Cobol I) or appropriate programming experience in Cobol and the instructor's permission.

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
EDP 211—Cobol III	2	4	4
Extensive programming practice in Cobol designed to develop in the prospective programmer facility in coding and debugging Cobol-programs. Prerequisite is EDP 202 (COBOL I) and EDP 210 (COBOL II) or appropriate programming experience in COBOL and the instructor's permission.			
EDP 215—Operating Systems	3	2	4
General introduction to Job Control Language (JCL); thorough coverage of the JOB, EXEC, and DD cards in JCL; advanced options available through use of LINKAGE EDITOR; Direct Access storage devices and organization methods; introduction to utilization of the UTILITIES. Prerequisite is either EDP 201 (Assembly Language II) or EDP 210 (COBOL II). This course must be completed satisfactorily before the student may undertake the Field Project (EDP 223).			
EDP 220—Introduction to Systems Analysis	3	2	4
Who a systems analyst is and what he does; Tools of a systems analysis; Standards; File design; Program specification and testing; Feasibility studies; System implementation; Controls and security; Application packages; and Management information systems (MIS). Prerequisites are one year of accounting and either: (a) one quarter of any business-oriented computer language; or (b) EDP 104 (or the equivalent) and the instructor's permission.			
EDP 223—Field Project	2	8	5
Students are assigned practical-level problems, which they are expected to program and de-bug in a professional manner. Properly supervised commercial programming work can be used here with the instructor's permission. Normally student will use COBOL in their programs, but special arrangements will be made when possible for students desiring to utilize other languages (such as Assembly Language or Fortran IV Language). Prerequisites are Operating Systems EDP 215, and the courses that taught the computer language the student desires to use. NOTE: For those with special needs, special arrangements may be considered. Such students should contact their advisor about this at least one month before they intend to take EDP 223.			
EDP 224—Report Program Generator (RPG)	3	2	4
File Description Specifications sheet; Input Specifications sheet; Output Specifications sheet; Introduction to Calculation Specifications sheet; Use of control breaks; Thorough coverage of the Calculation Spec sheet; Matching with 2 input files (sequential); Table look-up utilizing the File Extension Specification sheet; and Appropriate programming assignments. Prerequisite is EDP 104 or previous programming experience and consent of the instructor.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

CIVIL ENGINEERING TECHNOLOGY

T-CIV 101—Surveying	2	6	4
Theory and practice of plane surveying including taping, differential and profile leveling, cross sections, earthwork computations, transit, stadia and transit-tape surveys. Prerequisite: None			
T-CIV 102—Surveying	2	6	4
Triangulation of ordinary precision; use of plane table; calculation of areas of land; land surveying; topographic surveys and mapping. Prerequisite: T-CIV 101 Corequisites: T-MAT 102, T-DFT 102			
T-CIV 103—Surveying	2	6	4
Route surveys by ground and aerial methods; simple, compound, reverse, parabolic and spiral curves; geometric design of highways; highway surveys and plants, including mass diagrams. Prerequisite: T-CIV 102 Corequisite: T-MAT 103			
T-CIV 109—Surveying Law	5	0	5
The study of the North Carolina State Statutes regarding the practice of surveying, study of conflicting elements in establishment of boundaries, riparian rights, adverse possession, preparation of abstracts, and laws affecting the drainage of land from the viewpoint of both existing proposed channels. Corequisite: T-CIV 103 or by permission of instructor			
T-CIV 114—Statics	5	0	5
Forces, resultants, and types of force systems; moments, equilibrium of coplanar forces by analytical and graphic methods; stresses and reactions in simple structures; equilibrium of forces in space, static and kinetic friction; center of gravity, centroids, and moment of inertia. Prerequisite: T-MAT 102			
T-CIV 211—Topographic Surveying	2	6	4
The practice of methods of making topographic surveys with conventional instruments to include the plane table. The use of photography for mapping purposes. The production of photo-maps, and the methods of ground control in aerial surveys. Applied field problems are included. Prerequisite: T-CIV 103			
T-CIV 212—Route Surveying	2	6	4
Advanced study in the laying out of railroads, highways, and canals with a concentration in grade and slope staking, spiral curves, superelevation. Applied field problems will be laid out. Prerequisite: T-CIV 211			
T-CIV 213—Advanced Surveying	3	3	4
Theories and practice of land surveying including sub-divisions, the use of the North Carolina Coordinate System, triangulation, trilateration, and astronomic observations. There will be extensive use of the electronic distance device and precision theodolites. There will be night labs in this course and attendance is mandatory. Prerequisite: T-CIV 212			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-CIV 214—Mapping and Sub-division Planning	2	6	4
Mapping principles and their applications in producing topographic, land, hydrographic, and photographic maps and their use in sub-division planning. Field trips will be made to various sub-division sites and to city and county planning offices. Prerequisite: T-DFT 102			
T-CIV 215—Properties of Materials	3	2	4
Introduction to the strength characteristics of various building materials subjected to loads; force systems; stresses and reaction in simple structures. Prerequisite: T-MAT 103			
T-CIV 216—Strength of Materials	3	2	4
Fundamental stress and strain relationship; torsion; shear and bending moments; stresses and deflections in beams; introduction to statically indeterminate beams; columns; combined stresses. Prerequisites: T-CIV 114, T-MAT 103			
T-CIV 217—Construction Methods & Equipment	5	0	5
Excavating methods and equipment used in building and highway construction; pile driving; construction techniques and equipment used in reinforced concrete buildings, bridges, lift-slabs, thin-shells and folded plates, erection methods and equipment of structural steel buildings and bridges; carpentry in house and heavy timber construction; construction safety. Field inspection trips. Prerequisites: T-DFT 102 or by permission of instructor.			
T-CIV 223—Codes, Contracts & Specifications	2	0	2
Basic principles and methods most significant in contract relationships; appreciation of the legal considerations in construction work; study of the National Building Code and local building codes, interpreting and outlining specification. Corequisite: T-CIV 117 or by permission of instructor			
T-CIV 226—Properties of Highway Materials	5	6	7
Study of the various building materials used in highway construction. Covers soil types and classification; soil stabilization; groundwater and frost action; compaction; aggregates; bituminous materials; and portland cement concrete. Laboratory work covers the common tests performed on soil and asphalt material. Prerequisite: T-MAT 103 and T-CIV 217			
T-CIV 227—Construction of Roads and Pavements	2	3	3
Construction practices for various types of road building, including soil properties, grading, subgrading, base courses, drainage, embankments, compaction, and formwork. Design, construction, and testing of rigid Portland-cement concrete and flexible bituminous pavements. Field inspection trips. Prerequisites: T-CIV 217, T-CIV 212, T-CIV 202			
T-CIV 228—Introduction to Drainage	2	3	3
Introduction to the basic principles of hydraulics and hydrology necessary to the understanding of the disposal of runoff. Topics include rainfall and runoff; basic fluid flow; closed and open channels; and flow through orifices and weirs. Laboratory work includes preparation of drawings of drainage structures and field trips. Co-requisite: T-CIV 211 or by permission of instructor			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-CIV 229—Highway Drainage	2	3	3

A continuation of principles of drainage with special emphasis on the surface drainage of streets, roads, and highways. Topics include culverts, median swales; curb and gutter drains; inlets; and debris control. Laboratory work includes preparation of drawings of highway drainage structures.
Prerequisites: T-CIV 228

T-CIV 230—Subdivision Drainage	2	3	3
--------------------------------	---	---	---

The principles of drainage and hydrology as applied to the removal of unwanted surface and subsurface water. Particular attention is given to the problem of urban storm drainage; storm sewers; and sewer apportanances. Laboratory work consists of developing a drainage plan for a small subdivision.
Prerequisite: T-CIV 229

T-CIV 232—Bridge Inspection	3	2	4
-----------------------------	---	---	---

The application of the basic properties of construction materials, principles of strength of materials, and construction methods to the inspection of highway bridges. Particular attention will be given to bridge inspection as required by the Federal-Aid Highway Act. Both inspection techniques and reporting are considered.
Prerequisites: T-DFT 230, T-CIV 217, T-CIV 223

DENTAL HYGIENE

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DEN 101—Dental Anatomy I	2	3*	3
Basic knowledge of the anatomy, nomenclature, arrangement and minute structure of the human dentition and all supporting structures including a detailed study of deciduous and permanent teeth. Laboratory experiences include drawing graphic representation and carving selected teeth to correct dimensions. The use of plaster models will be included. Prerequisite: None			
DEN 111—Introduction to Dental Hygiene	3	0	3
A composite course designed to acquaint the first year students with the content of the dental hygiene curriculum, relation of courses of study to the practice of dental hygiene, the professional responsibilities of the hygienist and her relation to the dental health team, principles of patient education, oral inspection and physiotherapeutic aids. Also included will be an introduction to dental and medical terminology, methods of study, and use of library facilities. Prerequisite: None			
DEN 112—Preclinical Dental Hygiene	1	9*	4
Principles and procedures of oral prophylaxis with repetitive practice on the dental manikin and student partners. Proper instrumentation, fulcrum position, care of instruments including sharpening, sterilization, and storage. Proficiency in charting existing oral conditons, taking medical histories, and knowledge of first aid procedures and principles will be emphasized. Prerequisite: DEN 111			
DEN 113—Introduction to Clinical Dental Hygiene	2	12*	6
Further development of skills in manipulating instruments and materials used in oral prophylaxis and application of clinic procedures at the chair. Practical experience will include proper patient and operator positioning, patient education, record keeping, examination and charting. Prerequisite: DEN 112			
DEN 123—Periodontia and Preventive Dentistry I	2	0	2
Study of the periodontium and periodontal pathology, the "causes and effects" of dental disease, and information in developments in the field of science which contribute to preventive dentistry. Emphasis will be placed on the role of the dental hygienist in the treatment and prevention of periodontal disease. Prerequisite: DEN 102			
DEN 133—Dental Radiography	2	2	3
Study of the principles related to the exposing, processing, identification and mounting of x-rays, using both the parallel and bisecting angle techniques. This course further includes emphasis on radiation safety standards and laboratory experiences will include practice in both intra-oral and extraoral techniques. Prerequisite: DEN 101			
DEN 142—Oral Histology and Embryology	1	0	1
A detailed study of the embryonic development of the face and oral cavity, cell structure and microscopic anatomy of the oral cavity. Prerequisite: DEN 101			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DEN 206—Dental Hygiene Seminar	0	3*	1
Designed to summarize and correlate the course content of the previous quarters and to increase the awareness of the dental hygienist's role in total health care. Prerequisite: By permission of instructor			
DEN 214—Clinical Dental Hygiene I	2	12*	6
Continuation of DEN 113 with greater emphasis on progress in performance of various oral hygiene procedures. Principles and procedures related to management of the dental office. Practical knowledge in the administration of the dental business and management of patients. Prerequisite: DEN 113			
DEN 215—Clinical Dental Hygiene II	1	12*	6
Further clinical experiences in oral hygiene procedures with emphasis on development of self-direction in evaluation of procedures. Prerequisite: DEN 214			
DEN 216—Clinical Dental Hygiene III	2	12*	6
Continuation of DEN 215 with broadened experience in clinical procedures and practice. A study of ethics and jurisprudence will be included in this course. Prerequisite: DEN 215			
DEN 224—Periodontia and Preventive Dentistry II	2	2	3
Continuation of DEN 123 with more detailed analysis of the periodontium and periodontal pathology and greater emphasis on a periodontal control program. Laboratory experiences include utilizing oral physiotherapy procedures including establishing a periodontal control program and dietary analysis with selected patients. Prerequisite: DEN 123			
DEN 225—Community Dentistry I	2	3	3
A course designed to give the student an introduction to the role of the hygienist in public health organizations, armed forces, in community health programs, hospital dental clinics, in research and in dental specialty offices. Field trips will be planned whenever possible for broader experience. Prerequisite: DEN 244			
DEN 226—Community Dentistry II	2	3	3
A continuation of DEN 225 with more detailed analysis of the responsibilities of the dental hygienist in promoting dental health in areas outside of the dental office. Laboratory periods consist of actual experience in these areas. Prerequisite: DEN 225			
DEN 234—Dental Materials	2	3*	3
Identification and study of materials commonly used in the dental office with principles and procedures related to their manipulation and care. Special emphasis is placed on those materials associated with the responsibilities of the hygienist. Prerequisite: By permission of instructor			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DEN 235—Dental Health Education	1	2	2
Designed to educate the student to the importance of effective communication as a dental health educator. Includes methods and materials used in teaching dental health and class projects are done on organizing dental health programs using self-designed materials for all age levels. Group activity is experienced on campus and in the public school classroom. Prerequisite: By permission of instructor			
DEN 254—General and Oral Pathology	2	0	2
Study of the anatomic and physiologic deviations from the normal that constitute disease or characterize a particular disease with special emphasis on the relationship of the hygienist to oral pathologic conditions. Prerequisites: DEN 123, BIO 122			
DEN 255—Introduction to Pharmacology	2	0	2
Study of basic information related to the field of pharmacology and particularly those agents prescribed by dentists and commonly used by patients whose systemic or oral conditions, including drug abuse, require special procedures in the dental office. Study of properties, dosage, therapeutic effects, methods of administration and indications and contraindications of drugs used as adjuncts in dental procedures. Prerequisites: DEN 254, BIO 121, BIO 122			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DENTAL ASSISTANT			
DEN 1001—Introduction to Dental Assisting	2	0	2
An introduction to the history of dental assisting, the modern role of the dental assistant in practice and in relation to other members of the dental health team, dental terminology, and the personal and ethical requirements for safe and effective practice. Prerequisite: None			
DEN 1002—Dental Materials	3	9	6
Identification of dental materials, characteristics of each, evaluation of quality, and principles and procedures related to manipulation and storage of various dental materials. Prerequisite: None			
DEN 1003—Dental Anatomy	1	2	2
Basic information of oral and dental anatomy as related to dental science and the practice of dental assisting. Prerequisite: None			
DEN 1004—Preclinical Sciences II	4	0	4
Fundamental information from oral pathology, pharmacology, nutrition, and common emergencies as related to the role of the dental assistant. Designed in four units to permit flexibility in scheduling. Prerequisite: DEN 1003			
DEN 1005—Dental Accounting	3	2	4
Fundamentals of accounting as applied to dental office procedures. Practice in application of principles to various forms commonly used in dental office. Prerequisite: None			
DEN 1006—Clinical Procedures I	3	6	5
Principles and procedures related to dental instruments and equipment, and chairside techniques of dental assisting with emphasis on four-handed dentistry. Prerequisite: DEN 1002			
DEN 1007—Clinical Procedures II	4	6	6
Role of the dental assistant in various dental specialties, such as endodontics, periodontics, orthodontics, prosthodontics, and oral surgery. Prerequisite: DEN 1006			
DEN 1008—Dental Office Management	4	3	5
Principles and procedures related to management of the dental office, including maintenance of inventories, ordering of supplies, patient records, financial records, making appointments and establishing favorable patient relations. Prerequisite: DEN 1005			
DEN 1009—Dental Office Practice I	0	12	4
Introduction to practice in the dental office or dental clinic; emphasis is on the role of the dental assistant in the operatory in a variety of dental procedures. Prerequisite: DEN 1006			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DEN 1010—Dental Office Practice II	0	21	7
Practice in the dental office or dental clinic; rotation of assignments to encompass experience in office management, the dental laboratory, and the operatory. Emphasis on chairside assisting including expanded duties in a variety of clinical procedures. Prerequisite: DEN 1009			
DEN 1011—Dental Assistant Seminar	2	0	2
Study of personal responsibilities as a member of the dental health team, including employee-employer relations, opportunities for continued personal and professional development. Prerequisites: DEN 1007, DEN 1008, DEN 1012			
DEN 1012—Dental Roentgenology	2	6	4
Study of principles related to exposing, processing, and mounting dental x-ray. Radiation hazards and safety measures employed for protection of patient and self are stressed. Prerequisite: None			
DEN 1013—Oral Health Education	1	2	2
Designed to present information on deposits and stains, dental caries and periodontal disease as related to prevention and control with emphasis on development of self confidence in interpreting dental health information and in demonstrating techniques to individuals and groups. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DRAFTING			
T-DFT 101—Technical Drafting	0	6	2
The field of drafting is introduced as the student begins study of drawing principles and practices for print reading and describing objects in the graphic language. Basic skills and techniques of drafting included are use of drafting equipment, lettering, freehand orthographic and pictorial sketching, geometric construction, orthographic instrument drawing of principal views, and standards and practices of dimensioning. The principles of isometric, oblique, and perspective are introduced. Prerequisite: None			
T-DFT 102—Civil Drafting	0	6	2
Introduction to drawing associated with surveying technology. Topics covered include: preparation of real estate plats as required for deed registration; topographic maps; contours; highway plan and profiles; and earthwork. Drawings are done in pencil and in ink on paper, cloth, and plastic film. Prerequisite: T-DFT 101			
T-DFT 230—Structural Drafting	2	6	4
Drawing of structural plans and details as prepared for building construction including steel, concrete and timber structural components. Appropriate details and drawings necessary for construction and fabrication of structural members. Reference materials will be used to provide the draftsman with skills and knowledge in locating data and in using handbooks. Prerequisite: T-ARC 102			
DFT 1101—Schematics and Diagrams	3	2	4
Interpretation and reading of schematics and diagrams. Development of ability to read and interpret blueprints, charts, instruction and service manuals, and wiring diagrams. Information on the basic principles of lines, views, dimensioning procedures, and notes. Prerequisite: None			
DFT 1104—Blueprint Reading: Mechanical	0	3	1
Interpretation and reading of blueprints. Information on the basic principles of the blueprint; lines, views, dimensioning procedures and notes. Prerequisite: None			
DFT 1109—Electrical Blueprints and Layouts	3	0	3
Provides a basic working knowledge of how to read and understand electrical plans and circuits. How to draw and make drawings of electrical circuits. Use of electrical symbols in blueprints and wiring diagrams. Planning and estimating electrical requirements from plans. Prerequisites: ELC 1112, ELC 1127			
DFT 1110—Blueprint Reading: Building Trades	0	3	1
Principles of interpreting blueprints and specifications common to the building trades. Development of proficiency in making three view and pictorial sketches. Prerequisite: None			
DFT 1111—Blueprint Reading & Sketching	0	3	1
Principles of interpreting blueprints and specifications common to the building trades. Practice in reading details for grades, foundations, walls, elevations, chimneys, fireplaces, arches and cavity wall construction. Development of proficiency in making three view and pictorial sketches. Prerequisite: DFT 1110			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
DFT 1112—Blueprint Reading and Sketching	0	3	1
Designed to develop abilities in reading complex drawings in the masonry field. Blueprints of residential and commercial buildings will be studied with emphasis on the plot plan, floor plan, basement and/or foundation plan, walls and various detailed drawings of masonry work. Prerequisite: DFT 1111			
DFT 1117—Blueprint Reading: Welding	0	3	1
A thorough study of trade drawings in which welding procedures are indicated. Interpretation, use and application of welding symbols, abbreviations, and specifications. Prerequisite: DFT 1104			
DFT 1118—Pattern Development and Sketching	0	3	1
Continued study of welding symbols; methods used in layout of sheet steel; sketching of projects, jigs and holding devices involved in welding. Special emphasis is placed on developing pipe and angle layouts by the use of patterns and templates. Prerequisite: None			
DFT 1180—Trade Drafting	2	3	3
This course is designed as an introductory course in drafting for students needing a knowledge of drawing principles and practices for reading and describing objects in the graphic language. The student is expected to gain basic skills in drawing with instruments, lettering, geometrical constructions, freehand sketching, and describing objects orthographically with principal views. Freehand sketching and orthographic reading are to be emphasized. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

ELECTRICAL INSTALLATION AND MAINTENANCE

ELC 1101—Basic Electricity	3	0	3
A study of basic electricity and the electrical systems, single phase and three phase power, their voltages and uses. Types of electrical circuits and their control devices. Electrical materials and tools. The National Electrical Code requirements as applied to branch circuits and their over-current protective devices. Practical application of basic electrical circuits, troubleshooting and repair of circuits. Prerequisite: PHY 1105			
ELC 1112—Electrical Theory	5	9	8
A study of the Electron Theory and Magnetism. The relationship between voltage, current and resistance. Electrical terms and symbols. Basic electrical circuits—series, parallel and combination. Types of electrical measuring devices and how to apply them in electrical circuits. Electrical systems for lighting and power. (wye & delta) Prerequisite: None			
ELC 1113—Electrical Motors & Controls (Elec. Inst. & Maint.)	6	12	10
Provides instruction and application in the installation of electrical motors and control devices, manual, automatic, remote control stations, relays, dual motor operations. Maintenance and troubleshooting, repair of controllers and control devices. Types of electrical motors, single phase, and three phase. Maintenance and repair of electrical motors. Prerequisites: ELC 1112, ELC 1126, DFT 1109, and ELC 1124			
ELC 1114—Electric Motors & Controls (Air Cond. & Refrig.)	0	6	2
Provides instruction and application in the installation of electrical motors and control devices, manual, automatic, remote control stations, relays, dual motor operations. Maintenance and troubleshooting, repair of controllers and control devices. Types of electrical motors, single phase, and three phase. Maintenance and repair of electrical motors. Prerequisite: ELC 1101			
ELC 1124A—Residential Wiring	5	6	5
Provides instruction and application in the installation of electrical requirements in residential dwellings. Regulations governing the wiring as listed in the National Electrical Code and in the specifications. Load calculation for family type dwellings. Installation of service equipment and branch circuits in actual building mock-ups. Prerequisites: ELC 1112, MAT 1115, ELC 1127			
ELC 1124B—Residential Installation	2	6	4
Provides instruction and application in the installation of electrical requirements in residential dwellings. Regulations governing the wiring as listed in the National Electrical Code and in the specifications. Load calculation for family type dwellings. Installation of service equipment and branch circuits in actual building mock-ups. Prerequisites: ELC 1112, MAT 1115, ELC 1126, ELC 1127, DFT 1109			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
ELC 1125—Commercial Installations	5	12	9
Provides instructions and application in the installation of electrical service equipment and branch circuits in commercial type buildings. Requirements for electrical service as set forth by the National Electrical Code. Load calculations. Actual wiring of commercial type installation in building. Prerequisites: ELC 1112, MAT 1115, ELC 1126, ELC 1127, DFT, 1109, ELC 1113, ELC 1124			
ELC 1126—National Electrical Code	2	4	4
Introduction to the National Electrical Code, 1971 Edition. The purpose and interpretations of the Articles of the Code. Prerequisites: ELC 1112, MAT 1115, ELC 1127			
ELC 1127—Electrical Materials and Tools	0	3	1
Provides instruction in the knowledge and use of electrical hardware and devices. Their use and application in the electrical installations. Types of electrical conductors and cable. Steel electrical raceways. Overcurrent protection devices. General knowledge of electrical tools, care and maintenance of tools and equipment. Prerequisite: None			
ELC 1129—Industrial Installation	3	6	5
Provides instructions and application in installation of electrical service in industrial type buildings. Installation of three phase power circuits. National Electrical Code requirements, and solid state controls circuits. Prerequisites: ELC 1112, ELC 1113, MAT 1115, ELC 1126, ELC 1127, ELC 1124, ELC 1125, and DFT 1109			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
ENGLISH			
ENG 92—Developmental Reading	3	0	3
A laboratory approach to reading development. Emphasis is placed on vocabulary building, comprehension and rate. The instructor will determine areas of deficiency and design a reading development program to meet the individual needs.			
Prerequisite: None (Non Credit)			
ENG 93—Reading and Vocabulary I	5	0	5
A practical approach to reading and vocabulary development. Included are dictionary skills, word attacks, pronunciation skills, the techniques of interpretative and critical reading, and the elements of sentence construction.			
Prerequisite: None (Non Credit)			
ENG 94—Reading and Vocabulary II	5	0	5
A continued practical approach to reading and vocabulary development. Time is also devoted to grammar, sentence structure, punctuation, and spelling.			
Prerequisite: None (Non Credit)			
ENG 95—Composition and Grammar	5	0	5
Intended to stimulate students in applying the basic principles of English grammar in their day-to-day situation in industry and social life. Emphasis is placed on grammar, sentence structure, punctuation and spelling. Proper use of the library for reference work will be stressed.			
Prerequisite: None (Non Credit)			
ENG 100—Developmental English	5	0	5
A basic course in English grammar and composition. Recommended for students who evidence a need for an improved mastery of the subject. Students receiving a grade of C or better may receive credit (3 hours credit) upon the recommendation of the instructor for English 101.			
Prerequisite: None (Non Credit)			
ENG 101—English Composition	3	0	3
Organizing and developing full length essays with a brief review of elements of grammar. A study of the types of short story and its elements.			
Prerequisite: English 100 or equivalent			
ENG 102—English Composition	3	0	3
Organizing and developing a research paper, with a brief review of elements of grammar as needed. A study of the drama and the novel and their elements.			
Prerequisite: English 101			
ENG 103—English Composition	3	0	3
A study of poetry as a genre and of nonfiction and critical writing.			
Prerequisite: English 102			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-ENG 101—Grammar	3	0	3
Designed to aid the student in the improvement of self-expression in grammar. The approach is functional with emphasis on grammar, diction, sentence structure, punctuation, and spelling. Intended to stimulate students in applying the basic principles of English grammar in their day-to-day situations in industry and social life.			
Prerequisite: None			
T-ENG 102—Composition	3	0	3
Designed to aid the student in the improvement of self-expression in written composition. Emphasis is placed on applying the basic concepts of correct diction and grammar to the organization of the written composition.			
Prerequisite: T-ENG 101 or equivalent			
ENG 1101—Reading Improvement	3	0	3
Designed to improve the student's efficiency and comprehension skills in reading. Time is also devoted to developing effective study habits, basic vocabulary, and the elements of simple paragraph development.			
Prerequisite: None			
ENG 1102—Business Writing	3	0	3
Fundamentals of correct language usage are applied to the business letter and the simple business or technical report.			
Prerequisite: ENG 1101 or the equivalent			
ENG 1103—Communication Skills	3	0	3
Designed to develop further effective communication through correct language usage and orderly thought processes both in speaking and writing.			
Prerequisite: ENG 1102 or equivalent			
ENG 201—English Literature	5	0	5
The study of English literature from Beowulf to the Romantic Period.			
Prerequisite: ENG 103			
ENG 202—English Literature	5	0	5
A continuation of ENG 201, including a study of English literature from the Romantic Period through the Modern Period.			
Prerequisite: ENG 201			
ENG 203—American Literature	5	0	5
A survey of representative American writers from the Colonial Period to Dickinson.			
Prerequisite: ENG 103			
ENG 204—American Literature	5	0	5
A continuation of English 203. A survey of representative writers from Dickinson until the present.			
Prerequisite: ENG 203			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
ENG 205—World Literature	5	0	5
A survey of the tempers of western thought from ninth century B.C. to 1600, stressing the relationship between literature and other arts. Prerequisite: ENG 103			
ENG 206—World Literature	5	0	5
A survey of the tempers of western thought from 1600 to the present stressing the relationship between literature and other arts. Prerequisite: ENG 103			
ENG 210—Creative Writing	3	0	3
A course geared to the needs and interests of student writers, covering form, style, and the techniques of the discipline, with special exercises adapted to the abilities of individual students. Prerequisites: ENG 103 and/or permission of instructor			
T-ENG 204—Oral Communication	3	0	3
A study of the basic concepts and principles of oral communication to enable the student to speak more effectively. Emphasis is placed on logical organization and effective presentation of ideas. Attention is given to a variety of speaking situations in which the student may find himself when he enters the business world. Prerequisite: T-ENG 102 or equivalent			
T-ENG 206—Business Communication	3	0	3
The fundamentals of English are used as a background for the organization and preparation of modern business (or technical) reports and letters. Various methods of report preparation are considered, as well as techniques of presenting material, i.e. graphs, tables, pictures, etc. The major types of business letters are discussed with emphasis placed on getting across the purpose of each type of letter. Prerequisite: T-ENG or the equivalent			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
FOREIGN LANGUAGE			
FRE 101—Elementary French	5	0	5
A study of the basic elements of French. Fundamentals of grammar, drill in pronunciation, and special emphasis on reading and oral comprehension in the language. This sequence is designed for students with less than two units of high school French. Lab work is required in addition to daily lectures.			
FRE 102—Elementary French	5	0	5
A continuation of FRE 101. Lab work is required in addition to dairly lectures. Prerequisite: FRE 101 or permission of instructor			
FRE 201—Intermediate French	5	0	5
An intermediate sequence designed to provide a systematic review of basic grammar and to further develop the skills of listening, speaking, reading, and writing French. Lab work is required in addition to daily lectures. Prerequisite: FRE 102 or permission of instructor			
FRE 202—Intermediate French	5	0	5
A continuation of FRE 201. Lab work is required in addition to daily lectures. Prerequisite: FRE 201 or permission of instructor			
FRE 211—Advanced Conversational French	5	0	5
A seminar course involving discussion of literature, history, and current developments in France. All discussion is in the language. Prerequisite: FRE 202 or permission of instructor			
FRE 212—A Cultural View of France	5	0	5
A study of the history, geography, people, and customs of the French nation. This course is taught in English. Not to satisfy the language requirement. Prerequisite: None			
FRE 221—French Literature in Translation	5	0	5
Selected works of French literature studied in English. Not to satisfy the language requirement. Prerequisite: None			
SPA 101—Elementary Spanish	5	0	5
A study of the basic elements of Spanish. Fundamentals of grammar; oral and written comprehension, and special emphasis on self-expression in the language. Language lab work is required in addition to daily lectures. Prerequisite: None			
SPA 102—Elementary Spanish	5	0	5
A continuation of Spanish 101. Language lab work is required in addition to daily lectures. Prerequisite: SPA 101 or permission of instructor.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
SPA 201—Intermediate Spanish	5	0	5
A sequence designed to provide a systematic review of basic skills with a major emphasis on oral and written comprehension. Language lab work is required in addition to daily lectures.			
Prerequisite: SPA 102 or permission of instructor			
SPA 202—Intermediate Spanish	5	0	5
A continuation of Spanish 201. Language lab work is required in addition to daily lectures.			
Prerequisite: SPA 201 or permission of instructor			
SPA 211—Conversational Spanish	5	0	5
Emphasis on the systematic usage of the language from an oral approach through listening and speaking.			
Prerequisite: SPA 203 or equivalent			
SPA 212—Spanish and Spanish-American Civilization	5	0	5
Geographical, historical, and cultural aspects of Spain and Spanish-American civilization.			
Prerequisite: SPA 203 or equivalent			
SPA 221—Spanish Literature in Translation	5	0	5
Masterpieces of Spanish Literature in the drama, poetry, short story, essay and the novel. Not to satisfy the language requirement.			
Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
HEALTH AND PHYSICAL EDUCATION			
HEA 101—Personal and Community Health	5	0	5
The development of all aspects of personal and community health with underlying science to clarify and support health education.			
HEA 102—First Aid and Safety	3	0	3
A basic course in health education designed to teach the fundamentals of administering first aid. Emphasis is placed on accident prevention and practical application.			
PED 250—Introduction & History to Physical Education	3	0	3
This course is designed to give the physical education major, or minor, an introduction to Physical Education, and related areas, including the historical background, fundamental concepts, program content, training, qualifications, and professional opportunities in the field.			
PHYSICAL EDUCATION: The following are “service” courses in which the history, fundamental skills, rules of play, and recreational aspects will be presented.			
PED 101—Physical Conditioning I	2	0	1
Aids in the development of a higher degree of physical fitness and a personal physical maintenance program. Standard uniform required.			
PED 102—Softball	2	0	1
This course includes a study of the rules of softball, followed by instruction and practice in the basic skills and game play situations. Standard uniform required.			
PED 103—Soccer	2	0	1
This course introduces the student to the basic skills, fundamental techniques and strategy of soccer. Standard uniform required.			
PED 104—Social and Square Dance	2	0	1
An introduction to folk, square, and social dance for men and women. The course includes a brief history of dance, followed by instruction and practice in basic dance techniques. Emphasis will be placed on Square Dance.			
PED 105—Volleyball	2	0	1
This coeducational course includes instruction and practice in the basic skills, strategy and application of rules for volleyball. Standard uniform required.			
PED 106—Touch Football	2	0	1
Study of fundamental rules, and instruction and practice in the basic skills, and strategy of touch football. Standard uniform required.			
PED 107—Beginning Basketball	2	0	1
This course introduces the student to various rules, skills, and fundamental techniques of basketball. Standard uniform required.			
PED 108—Archery	2	0	1
This course is designed to provide the student with basic skills, techniques and knowledge in target archery.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PED 109—Tennis	2	0	1
This course includes a brief history and study of the rules of tennis, followed by instruction and practice in the basic fundamentals of the game. Students must provide their own tennis balls. Standard uniform required.			
PED 110—Wrestling	2	0	1
A study of fundamental skills, techniques, history, training methods, and strategy of wrestling. Standard uniform required.			
PED 111—Advanced Conditioning II	2	0	1
A second course in physical conditioning designed to provide the student with advanced participation in physical conditioning and circuit training, and develop a personal physical maintenance program. Standard uniform required.			
Prerequisite: PED 101			
PED 112—Advanced Basketball I	2	0	1
Designed for the more advanced male athlete who must be an active participant on the intercollegiate basketball team for his year on the team.			
PED 113—Bowling	2	0	1
A co-educational course in bowling that includes a brief history of bowling followed by instruction and practice in the basic skills. Participation in the Intramural Bowling League recommended. Ten dollar (\$10.00) fee charged.			
PED 114—Cheerleading	2	0	1
Approaches to the techniques of cheerleading which are based upon crowd psychology, cheerleading conduct on the field of play, and the cheerleading squad as a whole. Directing cheers, basic techniques in "motion," breathing, and tumbling. All prospective cheerleaders must be registered for their first year on the squad. Open to men and women.			
PED 115—Golf	2	0	1
A course that includes a brief history of golf, a study of rules, followed by instruction and practice in the basic and fundamental skills of the game. Golf fee charged. Students must provide their own golf balls.			
PED 116—Introduction to Tumbling and Gymnastics	2	0	1
An introductory course designed for men and women involving development of fundamental motor skills in stunts and tumbling. Emphasis is on personal enjoyment as well as self-confidence and good body mechanics through coordination, rhythm, and balance. Standard uniform required.			
PED 117—Weight Training	2	0	1
Introduction to the proper skills in the execution of the various lifts and instructions in the health and safety factors that are related to the development of an individualized weight training program. Standard uniform required.			
PED 121—Advanced Baseball I	2	0	1
Designed for the more advanced male athlete who must be an active participant on the intercollegiate baseball team for his first year on the team.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PED 208—Individual Activities	2	0	1
This coeducational course includes a study of the rules of badminton and deck tennis, followed by instruction and practice in the basic fundamentals and strategy of both recreational sports. Standard uniform required.			
PED 212—Advanced Basketball II	2	0	1
Designed for the more advanced male athlete who must be an active participant on the intercollegiate basketball team for his second year on the team. Prerequisite: PED 112			
PED 214—Cheerleading II	2	0	1
Approaches to the techniques of cheerleading which are based upon crowd psychology, cheerleading conduct on the field of play, and the cheerleading squad as a whole. Directing cheers, basic techniques in "motion," breathing and tumbling. All prospective cheerleaders must be registered for their second year on the squad. Open to men and women. Prerequisite: PED 114			
PED 221—Advanced Baseball II	2	0	1
Designed for the more advanced male athlete who must be an active participant on the intercollegiate baseball team for his second year on the team. Prerequisite: PED 121			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
HUMANITIES			
ART 101—Art Appreciation	5	0	5
Art expression emphasizing styles and forms beginning with cave art and continuing to the art of present day, including a survey of American art.			
DRA 202—Acting	3	0	3
A study of the basic principles underlying the actor's art; development of stage technique through the training of the body and voice as instruments of expressions. "Theater games" are played, followed by improvisations leading to playing short scenes. It is required that the student actor participate actively in the current production, either on stage or behind the scenes.			
DRA 203—Intermediate Acting	3	0	3
A continuation of Drama 202 with emphasis placed on acting in scenes to develop truth in character, timing, stage communication and conflict. It is required that the student actor participate actively in the current production, either on stage or behind the scenes.			
DRA 210—Introduction to the Theater			
A survey of the history of the theater beginning with the Greeks and continuing with the development of drama to its present stage. Prerequisite: None			
MUS 101—Music Appreciation	5	0	5
A study of the basic fundamentals of music with a survey of forms, styles, and composers, giving reference to cultural background and the integration of music with the other arts.			
PHI 201—Introduction to Philosophy	5	0	5
An introduction to the basic problems of human thought and the analyses of fundamental issues underlying daily life. A survey of the great and relevant philosophers from the Greeks to the present.			
SPH 201—Fundamentals of Speech	3	0	3
The study and practice of oral communication. Emphasis is on elementary physiology of speech, basic speech skills, speech composition, preparation, and presentation. Prerequisite: None			
SPH 202—Voice and Diction	3	0	3
A course designed to develop the voice to its optimum euphony through emphasizing central diaphragmatic breathing, pitch and volume control, clear articulation, and correct pronunciation. Prerequisite: SPH 201			
MACHINE SHOP			
MEC 1100—Machine Shop: Basic	2	6	4
Further develop skills in the use of measuring tools, acquaint the student with the procedures of layout work, correct method of using hand tools, basic fundamentals of drill press and lathe operation and hand grinding drill bits and lathe tools to meet needs common to the automotive shop. Prerequisite: None			
MEC 1112—Machine Shop Processes	0	6	2
To acquaint the student with the procedures of layout work and the correct use of hand and machine tools. Experiences in the basic fundamentals of drill press and lathe operation; hand grinding of drill bits and lathe tools; set-up work applied to the trade. Prerequisite: None			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
MATHEMATICS			
MAT 91—Preparatory Algebra I	5	0	5
A course for students without an adequate background in algebra or who have less than two units of high school algebra or whose placement test scores indicate a need for review. The instructor will design a program of instruction to meet the needs of the individual. Stress is placed upon the development of competence in the fundamental operations on counting numbers, integers, and rational numbers; simplification of algebraic expressions; solutions of equations; linear graphs; simultaneous linear equations; factoring solutions of quadratic equations by factoring. Prerequisite: None (Non Credit)			
MAT 92—Preparatory Algebra II	5	0	5
MAT 92 is a continuation of MAT 91. The objective of this course is to prepare students, who have weak background in mathematics or need a review, to enter MAT 102 by providing them with the necessary fundamental skills of algebra. The instructor will design a program of instruction to meet the needs of the individual. Any student enrolled in MAT 91, who also achieves the desired objectives of MAT 92 will be given credit for MAT 92, as well as MAT 91. Prerequisite: MAT 91 (Non Credit)			
MAT 93—Mathematics I	5	0	5
Development of skills in reading numerals and decimals, rounding whole numbers, addition, subtraction, multiplication and division of whole numbers decimals, prime and composite numbers, common fractions, decimal fractions and appropriate practical application problems. (Non Credit)			
MAT 94—Mathematics II	5	0	5
Development of skills in the relationship between percent, fractions and decimals. A study of squares and square roots, binary numbers, measure of weight-dry capacity liquid and time—24-hour clock. Compound numbers of two or more denominations—fundamental operations and Aliquot parts are also included. (Non Credit)			
MAT 95—Mathematics III	5	0	5
Introduction to word problems and solution to simple equations, formulas and evaluation of algebraic expressions as they pertain to payrolls, simple and compound interest, taxes, installment buying and other consumer problems. Interpretation of tables and graphs. (Non Credit)			
MAT 101—Technical Mathematics	5	0	5
The real number system is developed as an extension of natural numbers. Number systems of various bases are introduced. Fundamental algebraic operations, the rectangular coordinate system, as well as fundamental trigonometric concepts and operations are introduced. The application of these principles to practical problems is stressed. Prerequisite: Satisfactory evidence that admission requirements have been met			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
MAT 102—College Algebra	5	0	5

This course offers an introduction to an algebraic structure through the use of the algebra of sets, an axiomatic development of the real numbers, and the algebra of polynomials; a rapid review of elementary algebra; an introduction to elementary functions through the study of algebraic, exponential, and logarithmic functions; and an algebraic and graphical solution of systems of linear and quadratic equations and inequalities. Additional topics include: determinants, binomial theorem, permutations, combinations, theory of equations, and complex numbers.

Prerequisites: Two years of high school algebra or MAT 111 and 112 with the recommendation of the instructor

NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.

T-MAT 102—Technical Mathematics	5	0	5
--	---	---	---

A continuation of T-MAT 101. Advanced algebraic and trigonometric topics including quadratics, logarithms, determinants, progressions, the binomial expansion, complex numbers, solution of oblique triangles and graphs of the trigonometric functions are studies in depth.

Prerequisite: T-MAT 101

MAT 103—Trigonometry	5	0	5
-----------------------------	---	---	---

This course offers a review of sets, real numbers, relations and functions, geometric concepts, and the rectangular and polar coordinate systems; an analytical and graphical study of the properties and applications of the trigonometric and circular functions, the inverse trigonometric functions, vectors, and complex numbers; a study of the techniques of proving trigonometric identities and solving trigonometric equations; and the use of logarithms as applied to trigonometric problems.

Prerequisites: MAT 102 or MAT 112 and the recommendation of the instructor

NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.

T-MAT 103—Technical Mathematics	5	0	5
--	---	---	---

The fundamental concepts of analytical geometry, differential and integral calculus are introduced. Topics included are graphing techniques, geometric and algebraic interpretation of the derivative, differentials. Rate problems in practical situations are also stressed.

Prerequisite: T-MAT 102

T-MAT 106—Electronic Data Processing Mathematics I	5	0	5
---	---	---	---

This course offers a comprehensive study of place-value, number bases, scientific and floating-point notations, and the concept of absolute value; a development of the Laws of Exponents; an introduction to the operations on irrational algebraic expressions; an introduction to elementary and logarithmic functions; exercises in the interpretation of graphs and solutions of linear equations and inequalities; and an introduction to the solution of linear systems in two variables.

Prerequisite: None

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
T-MAT 107—Electronic Data Processing Mathematics II	5	0	5
This course is a continuation of T-MAT 106. Topics presented are: multi-variable linear systems, determinants, Cramer's rule, matrix theory and applications to linear systems, sequences and series, introduction to logic and Boolean algebra, and algorithms and iterative techniques. Prerequisite: T-MAT 106			
T-MAT 110—Business Mathematics	5	0	5
This course stresses the fundamental operations and their application to business problems. Topics covered include payrolls, price marking, interest and discount, commission, taxes, and pertinent uses of mathematics in the field of business. Prerequisite: None			
MAT 111—Contemporary College Math I	5	0	5
This course is designed to introduce to the general or liberal arts student broad areas of mathematics which have contributed to civilization and which may be utilized by him in his endeavors. MAT 111 includes mathematical system and structures, such as the algebra of sets, logic, number systems, and elementary algebraic operations. Numeration systems are also studied. Prerequisite: MAT 91 or equivalent			
MAT 112—Contemporary College Math II	5	0	5
This course is a continuation of MAT 111. Topics include the simplification of algebraic expressions and the study of radicals and rational exponents, equations and inequalities, polynomials, relations, functions and graphs, permutations, combinations, and an introduction to probability and statistics. Prerequisite: MAT 111			
IAT 201—Calculus and Analytic Geometry I	5	0	5
This course offers an introduction to differential and integral calculus through a study of slopes of lines and curves; concept of limits and continuity; concept of, and method for finding, derivatives; differentials and their use in related rates, maxima, minima; a development of the Mean Value Theorem; and a study of the definite integral, simple methods of integration and their use in finding areas under a curve. Prerequisites: MAT 102 and MAT 103 or permission of the Dean of Academic Affairs			
AT 202—Calculus and Analytic Geometry II	5	0	5
This course offers a continuation of MAT 201 through a study of methods in differentiating and integrating the transcendental functions; a development of the Fundamental Theorem of Calculus; applications of integration in word problems, volumes of simple solids of revolution, and practical applications involving transcendental functions; and the inverse trigonometric function with differentiation and integration. Prerequisite: MAT 201 or equivalent			
AT 203—Calculus and Analytic Geometry III	5	0	5
This course offers a continuation of MAT 202 through a study of differentiation and integration of hyperbolic functions, polar equations of two space curves, additional methods of integration, formulas such as partial fractions, conic sections; a review of determinants of linear equations and matrices; tangents and normals in two-space; and a deeper look at limits. Prerequisite: MAT 202 or equivalent			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
MAT 204—Calculus and Analytic Geometry IV	5	0	5
This course offers a continuation of MAT 203 through a study of sequences and series; vectors including differentiation, curvature, tangents and normals in three-space; partial derivatives and multiple integrals. Prerequisite: MAT 203 or equivalent			
MAT 250—Introductory Statistics	4	2	5
This course relates general concepts and methods in statistics with applications to contemporary life. Topics include introduction to statistical thought, descriptive statistics, problems of sampling and inference, testing of hypotheses, regression, correlation, and selected basic statistical techniques. Prerequisite: MAT 112 or MAT 102			
MAT 251—Statistics Laboratory I and Directed Study	0	2	1
A laboratory program which is individually designed to meet the needs of the student in his interests or chosen field. Selected topics and problems will be assigned. Prerequisite: MAT 250 or equivalent			
MAT 252—Statistics Laboratory II and Directed Study	0	2	1
This course is a continuation of MAT 251, giving the student an opportunity for a greater, in-depth study of problems and statistical techniques. Prerequisite: MAT 251 or equivalent			
MAT 1101—Fundamentals of Mathematics	5	0	5
This course includes an analysis of basic operations: addition, subtraction, multiplication and division; a study of fractions, decimals, powers and roots, percentages, ratio and proportion, plane and solid geometric figures used in industry; measurement of surfaces and volumes and an introduction to algebra used in trades. Practice in depth. Prerequisite: None			
MAT 1102—Applied Mathematics	5	0	5
A continuation of MAT 1101 with emphasis on applied formulas and problems within the student's field of study. A sampling of topics which may be presented are: ratio and proportion as applied to force, work, energy, simple machines, electricity; horsepower formulas, introduction to statistics and graphs. Prerequisite: MAT 1101 or permission of instructor			
MAT 1103—Geometry	3	0	3
Fundamental properties and definitions; plans and solid geometric figures, selected general theorems, geometric construction of lines, angles and plane figures. Dihedral angles, areas of plane figures, volumes of solids. Geometric principles are applied to shop operations. Prerequisite: None			
MAT 1104—Trigonometry	3	0	3
Trigonometric ratios; solving problems with right triangles, using tables, and interpolating; solution of oblique triangles using law of sines and law of cosines; graphs of the trigonometric functions; inverse functions, trigonometric equations. All topics are applied to practical problems. Prerequisites: MAT 1102, MAT 1103			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
MAT 1112—Building Trades Mathematics	3	0	3
Practical problems dealing with volumes, weights, ratios; mensuration; and basic estimating practices for building materials. Prerequisite: MAT 1101			
MAT 1115—Electrical Mathematics	5	0	5
This course analyzes basic concepts and operations in the base-10 numeration system, develops the use of formulas, and emphasizes skills in solving problems in electrical and related business calculations. Other topics may include powers of 10, scientific notation, tables and their interpretation, measurement of surfaces and volumes, wire sizes and ampacities, roots, and related subjects. Prerequisite: None			
MAT 1116—Electrical Mathematics	5	0	5
This is a continuation of MAT 1115 and deals with trigonometric functions, logarithms, plane vectors, alternating current, the use of the slide rule in computation and additional study of algebra. Prerequisite: MAT 1115			
MASONRY			
MAS 1101—Bricklaying	5	15	10
The history of the bricklaying industry. Clay and shell brick, mortar, laying foundations, laying bricks to a line, bonding, and tools and their uses. Laboratory work will provide training in the basic manipulative skills. Prerequisite: None			
MAS 1102—Bricklaying	5	15	10
Designed to give the student practice in selecting the proper mortars, layout, and construction of various building elements such as foundations, walls, chimneys, arches and cavity walls. The proper use of bonds, expansion strips, wall ties and caulking methods are stressed. Prerequisite: MAS 1101			
MAS 1103—General Masonry	5	15	10
Layout and erection of reinforced grouted brick masonry lintels, fireplaces, glazed tile, panels, decorative stone, granite, marble, adhesive terra cotta and modular masonry construction theory and techniques. Prerequisite: MAS 1102			
MAS 1113—Masonry Estimating	3	3	4
This is a practical course in quantity “take off” from prints of the more common type jobs for bricklayers and masons. Figuring the quantities of materials needed and costs of building various components and structures. Prerequisite: MAS 1103			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
POLICE SCIENCE			
PSC 101—Introduction to Police Science	5	0	5
A general course designed to familiarize the student with a philosophy and history of law enforcement, including its legal limitations in a democratic republic, a survey of the primary duties and responsibilities of the various law enforcement agencies, a delineation of the basic processes of justice, an evaluation of law enforcement's current position, and an orientation relative to law enforcement as a vocation.			
Prerequisite: None			
PSC 102—Introduction to Criminology	5	0	5
A survey of the different crimes; theories and factors attributing to criminal behavior, the student will study some of the penal and correctional procedures which have been used in the past as well as some of the contemporary methods.			
Prerequisite: None			
PSC 110—Police Role in Crime and Delinquency	3	0	3
An introduction to the cause and treatment of juvenile delinquency. The organization, functions, and jurisdictions of juvenile agencies; the processing and detention of juveniles, juvenile case disposition, juvenile status and court procedures. Evaluation of methods in delinquency control. Special attention will be given to forms of family, church, and community resources bearing on juvenile adjustment and preventative measures.			
Prerequisite: None			
PSC 112—Motor Vehicle Laws	3	0	3
A study of the traffic enforcement codes with primary emphasis placed on North Carolina Law.			
Prerequisite: None			
PSC 113—Identification Techniques	3	2	4
The student will study various identification methods and how they evolved into the present day systems. Techniques for lifting latent prints and taking rolled impressions will be developed through lab practice. Instruction will be given in the more popular ten finger and single print classification systems. An introduction will be given to the process of comparing latent lifts and rolled impressions and in preparing them for courtroom presentation.			
Prerequisite: None			
PSC 115—Criminal Law I	3	0	3
Designed to present a basic concept of criminal law and create an appreciation of the rules under which one lives in our system of government. Primary emphasis will be placed on North Carolina Law.			
Prerequisite: None			
PSC 116—Criminal Law II	3	0	3
A continuation of Criminal Law I which presents a basic concept of criminal law and creates an appreciation of the rules under which one lives in our system of government. Primary emphasis will be placed upon North Carolina Law.			
Prerequisite: T-PSC 115			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PSC 202—Police Community Relations	3	0	3
<p>A course designed to create an awareness of the need for good police and community relationship; problems confronting police personnel in achieving this goal; solutions to these problems, including a survey of non-police agencies dealing with police problems and how they can best work together to achieve their common goal.</p> <p>Prerequisite: Permission of instructor-coordinator</p>			
PSC 204—Police Photography	3	2	4
<p>A study of photographic equipment and its applications to the field of law enforcement. Instruction will be given in all phases of the photographic process including crime scene surveillance, macro and micro photography, including the development of negative and prints. The student will develop techniques in the use of different kinds of cameras and other photographic equipment through lab practice.</p> <p>Prerequisite: CHE 101</p>			
PSC 205—Criminal Evidence	3	0	3
<p>Instruction covers the kinds and degrees of evidence and the rules governing the admissibility of evidence in court.</p> <p>Prerequisite: PSC 115 and PSC 116</p>			
PSC 209—Interviews and Interrogations	5	0	5
<p>Instruction will be given in the various sources of information available to law enforcement agencies and in the techniques used in interviewing and interrogating.</p> <p>Prerequisite: Admission to the program; permission of instructor/coordinator</p>			
PSC 210—Criminal Investigation	3	2	4
<p>This course introduces the student to the fundamental of investigation; crime scene search; recording, collection and preservation of evidence; case preparation and court presentation; and the investigation of specific offenses such as arson, narcotics, sex, larceny, burglary, robbery and homicide.</p> <p>Prerequisite: Admission to the program; permission of the instructor/coordinator</p>			
PSC 211—Introduction to Criminalistics	3	2	4
<p>A general survey of the methods and techniques used in modern scientific investigation of crime, with emphasis upon the practical use of these methods by the students. Laboratory techniques will be demonstrated and the student will participate in actual use of the scientific equipment.</p> <p>Prerequisite: Admission to the program; permission of instructor/coordinator</p>			
SC 220—Police Organization and Administration	3	0	3
<p>An introduction to the principles of organization and administration including their application to field services such as vice control, traffic patrol, criminal investigation, and juvenile division. A discussion of the service functions, e.g., training, communications, records, property maintenance and miscellaneous services.</p> <p>Prerequisite: None</p>			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PSC 221—Police Supervision	3	0	3

A continuation of PSC 220 with emphasis on developing supervisory and management techniques employed at the various levels of police work.

Prerequisite: PSC 220

PSC 225—Criminal Procedure	2	0	2
-----------------------------------	----------	----------	----------

This course is designed to provide the student with a review of court systems; procedures from incident to final disposition; principles of constitutional, federal, state, and civil laws as they apply to and affect law enforcement.

Prerequisite: Permission of instructor/coordinator

PSC 240—Firearms and Defensive Tactics	3	2	4
---	----------	----------	----------

The course is designed to help the student develop an understanding of the need, use, and respect for all kinds of firearms. Range practice will be given in the use of rifles, shotguns, and pistols with a special effort made to develop proficiency in the use of the service revolver. Instruction will be given in riot control, nonlethal weapons such as tear gas, and defensive tactics used in the handling of arrested persons.

Prerequisite: Admission to the program; permission of the instructor/coordinator

Course Title	Hours Per Week			Quarter Hours Credit
	Class	Lab	Clinical	

PRACTICAL NURSE EDUCATION

NUR 1001—Fundamentals of Practical Nursing	6	4	0	8
---	---	---	---	---

Presents knowledge and skills basic to the nursing care of all patients. Focuses upon planning patient care based upon the individuality of the patient and his need to maintain homeostasis. Presents principles of body mechanics, methods of sterilization, cleaning techniques and principles of medical asepsis. Care of the patient's environment, daily hygienic needs of the patient and safe nursing practices are emphasized. Ethics, nurse-patient relationships and legal aspects of nursing practice are introduced. Basic nursing skills and use of hospital equipment are practiced in supervised laboratory periods and selected clinical situations.

Prerequisite: Admission requirements

NUR 1002—Anatomy and Physiology	6	0	0	6
---------------------------------	---	---	---	---

A study of the general plan of the body cells, tissues and systems including the musculoskeletal, circulatory, respiratory, digestive, endocrine, nervous, urinary and reproductive. Includes the functioning of the body; how it moves, stands erect, distributes nutrients and oxygen, removes wastes, reacts to invasion and maintains homeostasis.

Prerequisite: Admission requirements

NUR 1003—Nutrition and Diet Therapy	3	0	0	3
-------------------------------------	---	---	---	---

Introduces basic principles of nutrition. Describes sources of nutrients and their utilization by the body. Nutritional requirements of all age groups are considered. Meal planning to meet nutritional requirements of the family are discussed. Modifications of diet as specific therapy in certain disorders are presented.

Prerequisite: Admission requirements

NUR 1004—Vocational Adjustments	3	0	0	3
---------------------------------	---	---	---	---

Considers the role of the student practical nurse in relation to the patient and his family, the nursing team and the health care team. Beginning skills in interpersonal relationships and communications are introduced. Organizations open to practical nurses are presented and values of membership in professional organizations examined. Health agencies in the community are surveyed. Personal grooming and hygiene of the student nurse are given special emphasis.

Prerequisite: Admission requirements.

NUR 1005—Medical-Surgical Nursing I	6	0	0	6
-------------------------------------	---	---	---	---

Provides beginning knowledge of the nursing care of patients with common problems caused by illness. Emotional reactions to illness, hospitalization and therapy are presented. Methods of diagnosis and therapy are introduced. Nursing needs of the patient in pain, the patient with musculoskeletal problems, the cancer patient, the geriatric patient and the patient with chronic illness are examined. Care of the patient before, during and after anesthesia is discussed. Preoperative and postoperative care of the surgical patient is stressed. Concepts of rehabilitation nursing are introduced.

Prerequisite: Satisfactory completion of all first quarter courses

Course Title	Hours Per Week			Quarter Hours Credit
	Class	Lab	Clinical	
NUR 1006—Nursing of Children	3	0	0	3
Presents the scope and aims of present day nursing of children. Growth and development from infancy through senescence is presented. Psychological and physiological differences between children and adults are discussed. The needs of the hospitalized child and his family are explored and nursing implications stressed. Medical-surgical management and nursing care of children with common disorders are presented.				
Prerequisite: Satisfactory completion of all first quarter courses				
NUR 1007—Clinical Experience I	0	0	14	7
A. Medical-Surgical Nursing				
Provides supervised experience in basic nursing care of selected patients in a general hospital setting. Includes opportunities to meet patients' needs relating to personal hygiene, activity, exercise, hydration and nutrition. Beginning skills in carrying out nursing measures to assist the patient in maintaining normal body functions are practiced. Accuracy in charting, making observations and use of medical terminology is stressed. Development of individualized patient care plans (as introduced in NUR 1001) is emphasized. The concept of functioning as a member of the nursing team is introduced.				
B. Nursing of Children				
Provides supervised experience in the nursing of children in the pediatric department of a general hospital. Beginning skills in meeting specific needs of children with common disorders are developed through nursing care assignments of selected patients. Development of patient care plans is emphasized. Experiences in well baby clinic, immunization clinic and pediatric clinics are provided to stress the scope of child health care.				
Prerequisite: Same as NUR 1005				
NUR 1008—Pharmacology and Drug Therapy 2		0	0	2
Presents methods of calculating drug dosages and converting dosages from one system of measurement to another. Sources, actions and therapeutic uses of the major classifications of drugs are discussed. Knowledge of untoward effects of therapeutic agents are stressed. The nurse's responsibilities in relation to drug administration are emphasized. Legal aspects of drug usage and control are included.				
Prerequisite: Same as NUR 1005				
NUR 1009—Medical-Surgical Nursing II	5	0	0	5
Presents the etiology, incidence and physiological responses in common disorders of the body's respiratory, nervous and endocrine systems. Diagnostic methods, medical-surgical management and psychological responses to the various disorders are discussed. Patient teaching and rehabilitation are stressed as intrinsic aspects of nursing care.				
Prerequisite: Satisfactory completion of all second quarter courses				
NUR 1010—Maternity Nursing	4	0	0	4
Presents aspects of modern maternity nursing with emphasis upon the normalcy of pregnancy and childbirth. Physiological and psychological changes during the antepartum period, labor, delivery and the postpartum period are discussed. Complications of pregnancy labor and delivery are included. Characteristics and care of the normal newborn are presented. Emphasis is placed upon providing safe, high quality care for the expectant family.				
Prerequisite: Satisfactory completion of all second quarter courses				

Course Title	Hours Per Week			Quarter Hours Credit
	Class	Lab	Clinical	
NUR 1011—Clinical Experience II	0	0	14	7

A. Medical-Surgical Nursing

Provides opportunities for further development of basic nursing skills through supervised experiences in a general hospital setting. Care of selected patients with common medical-surgical disorders is emphasized. Development of patient care plans for specific patients is again stressed. Functioning as a member of the nursing team and utilization of all health team members to promote total patient care are important aspects of this experience.

B. Maternity Nursing

Provides opportunities to apply previously developed nursing skills to the care of maternity patients and normal newborns through supervised clinical experience in the maternity department of a general hospital. Beginning skills in meeting specific needs of postpartum patients, patients with complications of pregnancy, and normal newborns are developed through nursing care assignments of selected patients. Development of patient care plans continues to be emphasized. Observations of labor and delivery are provided. Experiences in antepartum clinic and postpartum clinic are provided to stress the scope of material health care.

Prerequisite: Satisfactory completion of all second quarter courses

NUR 1012—Pharmacology and Drug Therapy 2	0	0	2
--	---	---	---

Methods of drug administration are presented and practiced. Sources, actions, and therapeutic uses of the major classifications of drugs are discussed. The nurse's responsibilities in relation to drug administration is emphasized.

Prerequisite: Satisfactory completion of NUR 1008

NUR 1013—Personal and Vocational Relationships	2	0	0	2
---	---	---	---	---

Presents information regarding organizations with membership open to practical nurses. Stresses values of membership in professional organizations and continuing education as means of promoting personal and professional growth. Explores job opportunities for practical nurses. Provides simulated experiences in applying for a position, evaluating a position (on the basis of personnel policies and job description) and resigning from a position. Discusses the Nurse Practice Act of North Carolina, licensure in North Carolina and other states and legal aspects of nursing practice. Applications to write the State Board of Nursing Licensing Examination are completed and submitted at the end of this course.

Prerequisite: Satisfactory completion of all third quarter courses

NUR 1014—Medical-Surgical Nursing III	10	0	0	10
---------------------------------------	----	---	---	----

Presents the etiology, incidence and physiological responses in disorders of the body's cardiovascular, gastrointestinal, and genito-urinary systems. Diagnostic methods, medical-surgical management, and psychological responses to the various disorders are discussed. Nursing care of patients with common medical-surgical disorders is the focus of this course. Patient teaching and rehabilitation are stressed.

Theories of personality development are presented and mental health concepts are introduced. Concepts of medical self help and basic first aid principles as disaster nursing.

Prerequisite: Satisfactory completion of all third quarter courses

Course Title	Hours Per Week			Quarter Hours Credit
	Class	Lab	Clinical	
NUR 1015—Clinical Experience III	0	0	16	8

Provides opportunities for further development of basic nursing skill through supervised experiences in a general hospital setting. Care of selected patients with common medical-surgical disorders is emphasized. Development of patient care plans for specific patients is again stressed. Functioning as a member of the nursing team and utilization of all health team members to promote total patient care are important aspects of this experience. Opportunities to function in the role of assistant to the physician or professional nurse in emergency situations and in the care of critically ill patients are provided through selected experiences in various departments of the hospital. Under close supervision the opportunity to function as medication nurse is provided.

Prerequisite: Completion of all third quarter courses.

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
RADIO AND TELEVISION SERVICING			
ELN 1104—Fundamentals of Electronics I	2	2	3
A study of the structure of matter and the electron theory. The relationship between voltage, current, and resistance in series, parallel, and series parallel circuits will be introduced. Fundamental concepts of alternating current flow, including a study of resistors, capacitors, coils, and transformers and sources of AC and DC potentials are studied in the course.			
ELN 1105—Fundamentals of Electronics II	2	2	3
An introduction to vacuum tubes, diodes, and transistors. The theory, characteristics, and operation of vacuum tubes and transistors in simple voltage/amplifiers and power supplies are covered in the course.			
Prerequisite: ELN 1104			
ELN 1106—Radio and Amplifier Systems and Servicing	2	3	3
Course covers the theory and operation of each section and circuit of AM radios, FM radios, monophonic and stereophonic amplifiers. Lab time will concentrate on identification of circuits, proper adjustments; troubleshooting techniques and use of test equipment such as signal generator, oscilloscope, signal tracers, etc.			
Prerequisite: ELN 1104, ELN 1105, or proficiency exam			
ELN 1112—Direct and Alternating Current	5	15	10
A study of the structure of matter and the electron theory, the relationship between voltage, current and resistance in series, parallel, and series-parallel circuits. Analysis of direct current circuits by Ohm's Law and Kirchoff's Law; sources of direct current potentials. Fundamental concepts of alternating current flow; a study of reactance, impedance, phase angle, power and resonance and alternating current circuit analysis.			
Prerequisite: None			
ELN 1115—Television Receiver Circuits and Servicing I	2	4	4
A study of the principles of television receivers; included will be a study of the makeup of the television signal, block diagram analysis of monochrome and color television receivers, plus the characteristics of monochrome and color cathode ray tubes. Techniques of troubleshooting and repair of television receivers with the proper use of associated test equipment will be stressed.			
Prerequisite: ELN 1104, ELN 1105, ELN 1106, or proficiency exam			
ELN 1116—Television Receiver Circuits and Servicing II	2	4	4
A continuation of ELN 1115 culminating in students being able to draw schematics of a typical black and white television receiver showing key components. Key voltages and waveforms and explain the function of each key component and symptoms associated with their failure. Lab time will concentrate on performing repairs on black and white television receivers using proper equipment and procedures.			
Prerequisite: ELN 1104, ELN 1105, ELN 1106, ELN 1115, or proficiency exam			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
ELN 1117—Color Television Receiver Circuits and Servicing	2	4	4
Course covers makeup and transmission of color signals, color circuits and how they function. Lab time will concentrate on trouble-shooting procedures. Proper use of color television equipment and practice in proper set-up, convergence, etc. of color television sets. Prerequisites: ELN 1104, ELN 1105, ELN 1106, ELN 1115, ELN 1116, or proficiency exam			
ELN 1122—Vacuum Tubes and Circuits	5	9	8
An introduction to vacuum tubes and their development; the theory, characteristics and operation of vacuum biodes, triodes, pentodes, tetrodes, and special purpose tubes. The principles of radio and amplifier circuits using vacuum and other tube types. A study of power supplies and basic test equipment circuitry is included. Prerequisites: ELC 1112, MAT 1115			
ELN 1123—Introduction to Television	2	6	4
The theory and circuitry of monochrome television. Prerequisites: ELN 1122, ELN 1125, MAT 1116			
ELN 1124—Servicing Home Entertainment Electronic Devices	2	6	4
The principles and techniques of servicing radio receivers including AM, FM, and stereo. Tape recorders, amplifiers, and record player servicing are covered. Proper use of test equipment for diagnosis, alignment, and repairs are stressed. Prerequisites: ELN 1122, ELN 1123			
ELN 1125—Transistor Theory and Circuits I	2	6	4
Transistor theory, physics, characteristics, and their applications in radio receivers and audio amplifier circuits. Prerequisites: ELC 1112, MAT 1115			
ELN 1126—Transistor Theory and Circuits II	2	9	5
The theory and application of recent semi-conductor developments including zener diodes, tunnel diodes, field effect transistors, silicon controlled rectifiers, break over diodes (diacs), unijunction transistors and triacs. Prerequisites: ELN 1125, ELC 112, MAT 1115			
ELN 1127—Television Receiver Circuits and Servicing	10	15	15
A study of principles of television receivers, alignment of radio and intermediate frequency amplifiers, adjustment of horizontal and vertical sweep circuits will be taught. Techniques of troubleshooting and repair of TV receivers with the proper use of associated test equipment will be stressed. Additional study of more specialized servicing techniques and oscilloscope waveform analysis will be used in the adjustment, troubleshooting and repair of the color television circuits. Prerequisites: ELN 1123, ELN 1122, ELN 1124, ELN 1125, ELN 1126, MAT 116			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

Related Subjects for Practical Radio and Television Repair

EDU 1032—Related Science	2	0	2
--------------------------	---	---	---

Through practical learning experiences, the student will develop a measure of skill in the following: interpreting component symbols, fundamental electronics math for circuit analysis and color coding identification of components.

EDU 1033—Related Science	2	0	2
--------------------------	---	---	---

In this course the student will gain knowledge in reading amplifier schematic diagrams, and develop skills in the reading and interpretation of service information.

Prerequisite: EDU 1032

EDU 1034—Related Science	1	0	1
--------------------------	---	---	---

Through practical learning experiences, the student will develop skills in the use of schematics, mathematical notations and calculations necessary for servicing and replacing parts, and the interpretation of service manual data.

Prerequisite: EDU 1033

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
SCIENCE			
BIO 101—General Biology	3	2	4
Introduction to principles and concepts of biology; a study of the chemical and cellular basis of life and the homeostatic controls that operate in living organisms.			
BIO 102—General Biology	3	2	4
A continuation of BIO 101. Topics include classical and bio-chemical genetics and their relation to development and evolution.			
BIO 103—General Biology	3	2	4
A continuation of BIO 102 with emphasis on the ecology and evolution of life forms and a survey of the Monera, Protista, Plant, and Animal Kingdoms.			
BIO 121—Human Anatomy and Physiology I	4	2	5
The study of the structure and function of the human skeletal, muscular, nervous, circulatory, and respiratory systems, and the interdependence of these various systems to total body functioning. Prerequisite: None			
BIO 122—Human Anatomy and Physiology II	4	2	5
Part two of an integrated anatomy and physiology course of the human body with greater emphasis on the head and neck region. Prerequisite: BIO 121			
BIO 123—Introduction to Microbiology	3	3	4
Study of the fundamental principles of micro-organisms, including identification, classification, morphology, culture methods and media, modes of transmission, sterilization and pathogenic organisms. Prerequisite: None			
BIO 1101—Preclinical—Microbiology & Gross Anatomy & Physiology	2	2	3
Study of micro-organisms, including the classification, morphology, culture methods and media, identifying the role of pathogenic species in disease, modes of transmission and methods of control. Laboratory experiences provide opportunities for microscopic study of slides, for preparing slides and cultures, and for identifying colonies of selected pathogenic organisms. A study of the organizational plan of the human body and of the nine body systems. Emphasis is placed upon the role of the systems in the various processes essential to total body functioning and reproduction. Prerequisite: None			
CHE 101—General Chemistry	3	3	4
Introduction to the fundamental principles of chemistry. Topics include atomic and molecular structure; chemical bonding and states of matter; chemical periodicity; and chemical reactions, formula and equations.			
CHE 102—General Chemistry	3	3	4
A continuation of CHE 101 with emphasis on acid-base theory and elementary organic chemistry. Prerequisite: CHE 101			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
CHE 103—General Chemistry	3	3	4
A continuation of CHE 102 with emphasis on solution chemistry, ionic equilibria and electrochemistry. Laboratory work concentrates on the procedures and techniques of inorganic qualitative analysis.			
CHE 104—Nutritional Chemistry	3	0	3
The basic principles of nutrition and dietetics and how they apply to personal and community health. An analysis of diets, vitamin requirements, etc. to meet the needs of individuals in various life stages with emphasis on the responsibility of the dental hygienist in this role.			
Prerequisite: CHE 102			
T-PHY 101—Physics: Properties of Matter	3	2	4
A fundamental course covering several basic principles of physics. The divisions included are solids and their characteristics, liquids at rest and in motion, gas laws and applications. Laboratory experiments and specialized problems dealing with these topics are part of this course.			
Prerequisite: None			
T-PHY 102—Physics: Work, Energy, Power	3	2	4
Major areas covered in this course are work, energy, and power. Instruction includes such topics as statics, forces, center of gravity and dynamics. Units of measurement and their applications are a vital part of this course. A practical approach is used in teaching students the use of essential mathematical formulas.			
Prerequisites: T-PHY 101, T-MAT 101			
T-PHY 104—Physics: Light and Sound	3	2	4
A survey of the concepts involving wave motion leads to a study of sound, its generation, transmission and detection. The principles of wave motion also serve as an introduction to a study of light, illumination and the principles involved in optical instruments. Application is stressed throughout.			
Prerequisites: T-MAT 101, T-PHY 101			
HY 1101—Applied Science	3	2	4
An introduction to physical principles and their application in industry. Topics in this course include measurement, properties of solids, liquids, and gases, basic electrical principles.			
Prerequisite: None			
HY 1102—Applied Science	3	2	4
The second in a series of two courses of applied physical principles. Topics introduced in this course are heat thermometry, and principles of force, motion, work, energy, and power.			
Prerequisite: PHY 1101			
HY 1103—Work, Energy, Power	3	2	4
Physical principles of force, energy, work and power; equilibrium and the laws of motion; principles of machines, mechanical advantages, and transmission of power in practical applications and the use of vectors and graphical presentations.			
Prerequisites: PHY 1101, MAT 1101			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
PHY 1105—Shop Science I	3	2	4
Principles of measurement and a study of electricity. Subjects such as electron theory, magnetism, electromagnetism and its application, and elements of circuits and their effect on current will be considered.			
Prerequisite: None			
PHY 1106—Shop Science II	3	2	4
A discussion of basic physical principles and their application to industry. Topics of study may include properties of solids, liquids and gases; work and energy; power and power transmsion; hydraulics; and thermodynamics.			
Prerequisite: PHY 1105			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

SOCIAL SCIENCES

EDU 201—Introduction to Education	5	0	5
-----------------------------------	---	---	---

The study of education as an institution in society. Emphasis is on the educational system in the United States, its function, organization, and its history.

GEO 201—Physical Geography	4	2	5
----------------------------	---	---	---

A study of basic concepts of physical geography. The earth's physical features, weather, climate and astronomical relationship are emphasized. Regional and cultural geography are emphasized where pertinent.

GEO 202—Cultural Geography	5	0	5
----------------------------	---	---	---

A study in world patterns of population distribution, ethnic, cultural and economic diversity, settlement, production and consumption, transportation, communication, and territorial organization. Interrelationships between man and his environment are emphasized throughout the course.

IIS 101—Western Civilization I	3	0	3
--------------------------------	---	---	---

A study of the forces responsible for the rise of European states from prehistoric times through events prior to the Renaissance.

IIS 102—Western Civilization II	3	0	3
---------------------------------	---	---	---

A survey of the Renaissance, the Age of Reformation, the Commercial, Constitutional Government in England, Imperialism, and the French Revolution. Exploration and colonization and non-European areas and the relationship and influence on Europe.

Prerequisite: None

IIS 103—Western Civilization III	3	0	3
----------------------------------	---	---	---

A survey of the aftermath of Napoleon, the Congress of Vienna, European political revolts, the Industrial Revolution, political unification of Germany and Italy, World War I, World War II, and the rise and fall of Nazism and Facism, the development of Communism and capitalism and the Cold War.

IS 201—American History	5	0	5
-------------------------	---	---	---

A thorough survey of America from colonial times to the end of the Civil War. Emphasis is placed upon the political, cultural, social, and economics developments in the United States as they relate to the planting of the European colonies, the Revolutionary War, the writing of the Constitution and development of political parties, the War of 1812, Jacsonian Democracy, the development of northern and southern sectionalism, slavery, Manifest Desting and expansion, and major steps leading to the Civil War.

Prerequisite: None

NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
HIS 202—American History	5	0	5
A thorough survey of America from the Civil War to the present. Emphasis is placed upon the political, cultural, social, and economic developments in the United States as they relate to the Reconstruction Era, the Industrial Revolution, the Progressive Period, the Spanish-American War and World War I, the Depression and the New Deal, World War II, and domestic and foreign problems in the Cold War Era.			
Prerequisite: None			
NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.			
POL 201—American Federal Government	5	0	5
The study of the origins, development, structure, and functioning of the Federal Government.			
Prerequisite: None			
POL 202—State and Local Government	5	0	5
A survey of the functions of state and local governments and intergovernmental relationships with emphasis on the structure of North Carolina state and local governments.			
T-POL 201—United States Government	3	0	3
A study of government with emphasis on basic concepts, structure, powers, procedures and problems.			
Prerequisite: None			
PSY 1101—Human Relations	3	0	3
A study of the principles of human behavior. The problems of the individual are studied in relation to society, group memberships and relationship within the work situation.			
Prerequisite: None			
T-PSY 206—Applied Psychology	3	0	3
A study of the principles of psychology that will be of assistance in the understanding of inter-personal relations on the job. Motivation, feelings, and emotions are considered with particular reference to on-the-job problems. Other topics investigated are: employee selection, supervision, job satisfaction, and industrial conflicts. Attention is also given to personal and group dynamics so that the student may learn to apply the principles of mental hygiene to his adjustment problems as a worker and a member of the general community.			
Prerequisite: None			
PSY 201—Introduction to Psychology	5	0	5
The introductory study of psychology. The course includes the study of principles of behavior in the areas of motivation, perception, learning, intelligence, and the organization of personality.			
Prerequisite: None			
NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.			
PSY 202—Growth and Development	5	0	5
A study of the growth and development of the human being, beginning with the prenatal environment, with emphasis given to emotional, social, and intellectual development.			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
SOC 101—The Student in Society	3	0	3
An introduction to cooperative education with emphasis on responsibilities and opportunities associated with career selection; on preparation for employment in the business, industrial and professional community; and on fulfillment as an active participant in contemporary society. A course designed to assist students in making the transition from the college campus to the world of work.			
SOC 201—Introduction to Sociology	5	0	5
A study of the fundamental principles and concepts of sociology, with emphasis on contemporary American Institutions in relation to technological change.			
Prerequisite: None			
NOTE: This course may be taken through Independent Study under the supervision of an appropriate faculty member and in conjunction with the Learning Center. Approval must be obtained from the instructor.			
SOC 202—Social Problems	5	0	5
An introduction to the nature of social and cultural problems in contemporary society. Specific attention will be given to the causes, control, treatment, and prevention of problems relating to crime, divorce, race problems, poverty, and housing.			
Prerequisite: None			
SOC 203—Marriage and the Family	5	0	5
A study of marriage and family life as a social institution. A sociological approach to premarital and marital relationships, with emphasis placed on problems of the contemporary American family.			
Prerequisite: None			
T-SSC 201—Social Science	3	0	3
An integrated course in social sciences, drawing from the fields of anthropology, psychology, history, and sociology.			
Prerequisite: None			
T-SSC 202—Social Science	3	0	3
A further study of social sciences with emphasis on economics, political science, and social problems as they relate to the individual.			
Prerequisite: T-SSC 201			
T-SSC 205—American Institutions	3	0	3
A study of the effect of American social, economic, and political institutions upon the individual as a citizen and as a worker. The course dwells upon current local, national, and global problems viewed in the light of our political and economic heritage.			
Prerequisite: None			

P-1198 SPECIAL PROBLEMS

Elective course in programmed instruction offered through the Learning Laboratory. Student may, with approval from the Learning Lab Coordinator, select a course of pursuit from a variety of subject areas—to include math, English, reading comprehension, science, and subjects of general interest. Credit hours received will depend upon hours in attendance.

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	

WELDING

WLD 1101—Basic Gas Welding	1	3	2
Welding practices on materials applicable to the installation or repair of body panels. Students run beads, does butt and lap welds and brazing. Performs tests to detect strength and weakness of welded joints. Safety procedures are emphasized throughout the course. Prerequisite: None			

WLD 1105—Auto Body Welding	1	3	2
Taught in conjunction with AUT 1112, the welding skills gained in WLD 1101 are used to repair tears or cracks in sheet metal, patch panels or cut and replace damaged panels. Frames are also repaired using panels to reinforce weak or damaged areas. Prerequisite: WLD 1101			

WLD 1112—Technical Testing and Inspection	1	3	2
The standard methods for mechanical testing of welds. The student is introduced to the various types of tests and testing procedures and performs the details of the test which will give adequate information as to the quality of the weld. Types of tests to be covered are: bend, destructive, free-bend, guided-bend, nick-tear, notched-bend, tee-bend, nondestructive, V-notch, Charpy impact, etc. Prerequisites: WLD 1120, WLD 1121			

WLD 1120—Oxyacetylene Welding and Cutting	3	12	7
Introduction to the history of oxyacetylene welding, the principles of welding and cutting, nomenclature of the equipment, assembly of units. Welding procedures such as practice of puddling and carrying the puddle, running flat beads, butt welding in the flat, vertical and overhead position, brazing, hard and soft soldering. Safety procedures are stressed throughout the program of instruction in the use of tools and equipment. Students perform mechanical testing and inspection to determine quality of the welds. Prerequisite: None			

WLD 1121—Arc Welding	3	12	7
The operation of AC transformers and DC motor generator arc welding sets. Studies are made of welding heats, polarities, and electrodes for use in joining various metal alloys by the arc welding process. After the student is capable of running beads, butt and fillet welds in all positions are made and tested in order that the student may detect his weaknesses in welding. Safety procedures are emphasized throughout the course in the use of tools and equipment. Prerequisite: None			

WLD 1122—Commercial and Industrial Practices	3	9	6
Designed to build skills through practices in simulated industrial processes and techniques: sketching and layout out on paper the size and shape description, listing the procedure steps necessary to build the product, and then actually following these directions to build the product. Emphasis is placed on maintenance, repairing worn or broken parts by special welding applications, field welding and nondestructive tests and inspection. Prerequisites: WLD 1120, WLD 1121			

Course Title	Hours Per Week		Quarter Hours Credit
	Class	Lab	
WLD 1123—Inert Gas Welding	1	3	2
Introduction and practical operations in the use of inert-gas-shield arc welding. A study will be made of the equipment, operation, safety and practice in the various positions. A thorough study of such topics as: principles of operation, shielding gases, filler rods, process variations and applications, manual and automatic welding. Prerequisites: WLD 1120, WLD 1121			
WLD 1124—Pipe Welding	3	12	7
Designed to provide practice in the welding of pressure piping in the horizontal, vertical, and horizontal fixed position using shielded metal arc welding processes according to Sections VIII and IX of the ASME code. Prerequisite: WLD 1121			
WLD 1125—Certification Practices	3	6	5
This course involves practice in welding the various materials to meet certification standards. The student uses various tests including the guided bend and the tensile strength tests to check the quality of his work. Emphasis is placed on attaining skill in producing quality welds. Prerequisites: WLD 1120, WLD 1121, WLD 1123, WLD 1124			
WLD 1129—Basic Welding	2	4	3
Basic characteristics of metals, equipment, its construction and operation are presented by means of audio-visuals and other educational media. Welding demonstrations by the instructor and practice by students in the welding shop. Safe and correct methods of assembling and operating gas and arc welding equipment. Practice will be given in surface welding; bronze welding, silver-soldering, and flame-cutting and arc welding methods applicable to mechanical repair work. Prerequisite: None			
WLD 1180—Basic Welding	2	4	3
A short course in welding, both oxyacetylene and electric, designed as a helping course for Automotive Mechanics, Air Conditioning and Refrigeration Trade, Drafting, Sheet Metal and Machine Shop. This course covers a minimum of technical facts, and is designed to teach the student to weld in the flat position only with electric arc and oxyacetylene.			

BOARD OF TRUSTEES

Mr. Louis Shields, Chairman	Jacksonville, N. C
Dr. Willis Mease, Vice-Chairman	Richlands, N. C
Mrs. Wyatt V. Morton	Hubert, N. C
Mr. John D. Warlick	Jacksonville, N. C
Mr. Everitte Barbee	Richlands, N. C
Dr. James G. Jones	Jacksonville, N. C
Mr. William D. Mills	Maysville, N. C
Mr. John Huff	Jacksonville, N. C
Mr. Tommy Jones	Sneads Ferry, N. C
Mr. Ray Marshall	Maysville, N. C
Mr. Reuben Shaw	Richlands, N. C

Mr. Edward Trudell	Superintendent of Building and Grounds
Mrs. Donna Baxter	Custodian
Mrs. Beulah Duncan	Custodian
Mr. Richard Jones	Maintenance Man
Mr. Gary W. Darche	Maintenance Man
Mr. Nick Cavanaugh	Maintenance Man

The only valid philosophy for North Carolina is the philosophy of total education: a belief in the incomparable worth of all human beings, whose claims upon the State are equal before the law and equal before the bar of public opinion, whose talents (however great or however limited or however different from the traditional) the State needs and must develop to the fullest possible degree. That is why the doors to the institutions in North Carolina's System of Community Colleges must never be closed to anyone of suitable age who can learn what they teach. We must take the people where they are and carry them as far as they can go within the assigned function of the system. If they cannot read, then we will simply teach them to read and make them proud of their achievement. If they did not finish high school but have a mind to do it, then we will offer them a high school education at a time and in a place convenient to them and at a price within their reach. If their talent is technical or vocational, then we will simply offer them instruction, whatever the field, however complex or however simple, that will provide them with the knowledge and the skill they can sell in the marketplaces of our State, and thereby contribute to its scientific and industrial growth. If their needs are in the great tradition of liberal education, then we will simply provide them the instruction, extending through two years of standard college work, which will enable them to go on to the University or to senior college, and on into life in numbers unheard of in North Carolina. If their needs are for cultural advancement, intellectual growth, or civic understanding, then we will simply make available to them the wisdom of the ages and the enlightenment of our times and help them on to maturity.

DR. DALLAS HERRING, Chairman
